# 1. Introduction

WCM combines the functionality of call assignment, spares ordering and warranty claiming.

This User Manual will guide you through all main components of the Web Tool. For better orientation, this manual is built up in similar order as the Status-Points in WCM-Interface are.

The screenshot shows the Fujitsu WCM interface. At the top, there is a navigation bar with 'Home | Support | Logout'. Below this is a sidebar menu with options like 'Field Service', 'Technical question', 'Ersin', 'Translation Tool', 'Export', 'WCM News', 'DIFS for WCM', 'Spares', 'Reports', 'Settings', 'Customer', and 'Help'. The main content area is titled 'Service Calls (Assigned)' and contains a table with columns: Workorder, Serial No., Customer, Date, RT, Status, and Call Number. The table lists 12 service calls for Fujitsu Siemens Computers GmbH, with dates ranging from 03.08.2009 to 26.08.2009 and various RT values. To the right of the table is a 'Status' menu with a tree view of call statuses, including 'Requested (0)', 'Rejected (5)', 'Assigned (14)', 'Open (18)', 'In Progress (55)', 'Double Flatrate Calls (0)', 'Awaiting Immediate Action (0)', 'Repair successful (16)', 'To claim error (17)', 'Claim Workorder (68)', 'Validation center (41)', 'VC Revised Claims (1)', 'VC Rejected Claims (1)', 'Replied to Validation center (2)', 'Claims accepted (3)', 'Cancelled', and 'Closed'. A red circle highlights the 'Status' menu.

Workorder	Serial No.	Customer	Date	RT	Status	Call Number
995002281140	YKJN003007	Fujitsu Siemens Computers GmbH	03.08.2009	0	AssignedFCO

995002281212	YK2K001005	Fujitsu Siemens Computers GmbH	26.08.2009	48	AssignedFCO	

## 1.1 Basic information

### 1.1.1 Unique work order number

It is essential to use the unique work order number WCM creates while opening a call, in every single process step. Therewith FUJITSU can provide an overview about the latest status of labour and material of the warranty Call and is able to display the link of related processes between WCM and the Spare Parts Portal.

A novelty in FUJITSU spares Call handling is the work order number for self assigned Calls. In the past, only Helpdesk Calls were automatically supplied with work order numbers, now this principle is enhanced on every Call.

The nomenclature is: 12 digits work order number, issued by WCM, with a leading 99...

The work order number is mandatory from the very beginning of the Call process.

### 1.1.2 Encrypted Failure Description (Error Code System)

Please use the Error Code System carefully. WCM will preselect the appropriate spare parts by means of the error code. As well the FUJITSU Validation Centre will compare the spare part used with the coding.

Using our Error Code System has the advantage of being understood internationally in exactly the same way and furthermore it provides the opportunity of pre-diagnostics. This will be perceivable to your benefit in a significant decrease of DOAs especially for sporadic failures and in an enhancement for the automated spares proposals module of WCM.

In the long run, it will also help repairers of components to make precise diagnostics on chip level, instead of stating No Defect Found diagnosis.

The ECS code is mandatory in the Call opening file and again in the status update after the repair is done and Call is claimed.

### **1.1.3 System-serial number**

As usual the serial number is the major means to verify the warranty. As in the improved WCM process the warranty check is placed at the very beginning with a Serial number, you will be entrusted with a warranty work order. If no Serial number is available on the FUJITSU System, e.g. the number is illegible, only the FUJITSU Helpdesk can open a Call. Not contacting the Helpdesk in those cases means the repairing is done at your own risk.

The System serial number is mandatory for warranty check at the very beginning of Call process in WCM.

### **1.1.4 Service Type**

The service type under warranty is registered in “ADLER Installed Base” data base. If the warranty is expired but goodwill shall be granted, then this can also handled by work order offered from the FUJITSU Helpdesk only. In goodwill cases also work order numbers are created. work order number is always linked with a service type.

However, if the service type covered by FUJITSU warranty registered in ADLER is wrong, you can set a flag (wrong ADLER data flag) and proceed to repair.

In parallel you shall provide the warranty proof from the customer together with the work order number to FUJITSU Service Partner Management to have the Adler Data Base updated for later approval of the FUJITSU Validation Center. The WCM warranty commitment is stated to be preliminary and will be finalized by means of provided documentation by the FUJITSU Validation Centre after the repair is done.

Service Type is registered in ADLER data base and must be in warranty for self-assigned Calls. Otherwise the Helpdesk needs to be called.

### **1.1.5 ADEX-Order**

If you order only one spare part per Call, the order will automatically be a so called “ADEX order” (“Advanced Exchange Order”). In this case, an order and a return order will be created at the same time (= only one action step for you).

This differs from the “normal” order process, when you order a spare part and later on you create a return order. Thus there are two action steps to do here.

Another benefit of ADEX order: You will not receive an invoice or credit note, if you send back the defective part within 30 days. The only paperwork received is an “invoice” with amount of Zero. This allocation document is for information purposes and will not appear on your account. The amount of paperwork will be reduced and the need to manually match credits and invoices will not be necessary. Furthermore your account is smaller.

If you do not send the defective part back within 30 days, a normal invoice will be created after that time. If the faulty part is returned after the 30 days period, a normal credit note will be issued. For the valid terms and conditions please refer to the Service Logistics Manual.

If no return takes place after 60 days since delivery date, the return order will be cancelled. The Return Code CAN90 will be transferred to WCM. Therewith the Call will be forwarded to agree on the Service flat rate in the Validation Centre.

Afterwards return orders can only, for special cases, be winded up by Spares Return Clearing department.

### **1.1.6 Ship only order**

If you order more than one spare part per Call, the order is automatically a ship only order. Invoice will be created at the same day of delivery date.

For each material (N\* and R\*-parts) return order has be advised within 30 days after the call date, including order number, ordered material and returned material number.

After 60 days without physical return of R\* parts, the return order will be cancelled. Return Code CAN90 will be transferred to WCM. Therewith the Call will be forwarded to the Service flat rate in Validation Centre. Afterwards returns can only, for special cases, be winded up by Return Clearing department.

### **1.1.7 Ship only order in the Spare Parts Portal**

Orders related to a work order should have always been created in WCM.

If, by any reason, you want to create an order in the Spare Parts Portal instead of WCM there are some particular handling instructions:

**Basically: Warranty orders should always be entered in WCM.**

In the Spare Parts Portal you can choose between ADEX or ship only orders.

#### Ship only order:

Ship only orders are not restricted on warranty orders only. Thus the mask does not contain serial number fields. As warranty orders request Serial number and work order, please do not enter a work order number in field “additional reference” for ship only orders. This will cause an error message.

If the work order number shall appear on the delivery documents as internal order reference, please enter the work order number into the field “Your reference”.

#### ADEX orders:

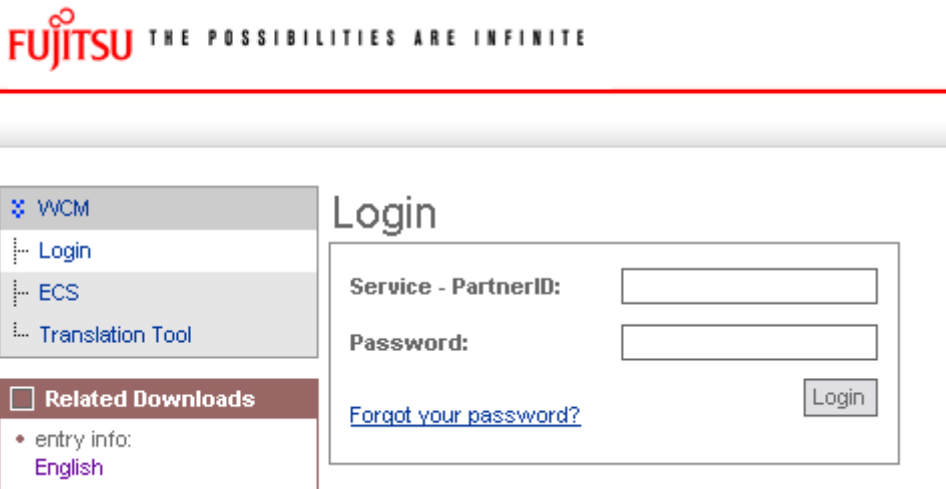

For ADEX orders (return with replacement) serial number as well as work order number is necessary.

If you order spare part by means of the Spare Parts Portal instead of WCM, it is recommended to “order” the parts in WCM as well. However to avoid a second delivery, the parts shall be registered as taken from “own stock” in WCM. WCM will perform some logical checks to state the part fits to the asset. Thus acceptance problems during the part return process of the warranty call can be prevented.

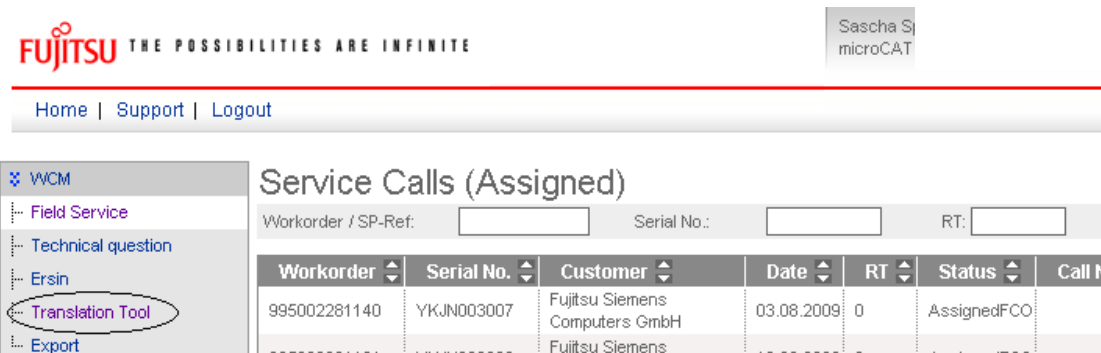

### 1.1.8 Selecting Spare Parts with ‘Translation Tool’ (virtual Fit-to-Asset Check)

WCM WEB offers a “Translation Tool” (TT) where a partner can check if a spare part is valid for an asset without opening a new work order.

Access to the TT is available from the left navigation menu before Login (see screenshot below)

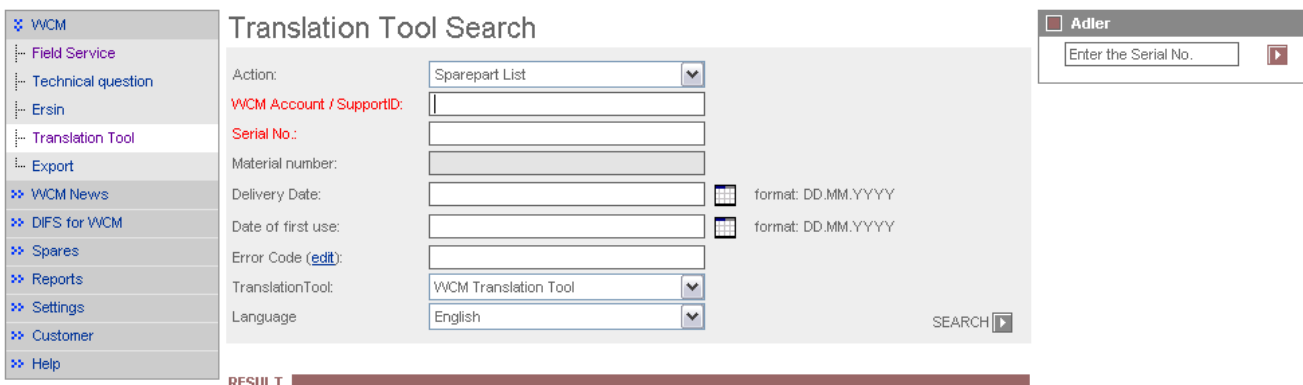

Or if already logged on to WCM WEB :

There are two options for searching within the Translation Tool

‘Spare Part List’ search by system serial no.

The result is a list of spare parts which can be replaced in the system, or if an Error Code has been submitted, which of the spare parts match.

The ‘Material Check’ search activates a Fit to Asset Check of a particular material number and helps Service Partners to select matching parts from own spares stock.

Additionally, in case of mismatch between delivery date of ADLER and customer purchase documents, the Service Partner may enter the delivery date as proven by customer's delivery note and verify spare parts warranty accordingly. For parts out of warranty, or for parts with limited warranty time, where no updated delivery date has been set the error warning <Material is out of limited warranty> is displayed.

### 1.1.9 Part Return in Spare Parts Portal

To grant the material credit for warranty Calls the work order number is mandatory! The corresponding order data has to be entered consistently. I.e.: work order number, serial number and order number of corresponding material have to be conforming to data in WCM.

### 1.1.10 Bulk orders in the Spare Parts Portal

Bulk orders are only possible in the Spare Parts Portal. Delivery lead times can be found in the Service Logistics Manual:

<http://partners.ts.fujitsu.com/com/service/general/service-spare/manual/Pages/default.aspx>  
Invoice will be created on delivery date.

**Notice:** If you “jump” from WCM WEB directly into Spare Parts Portal, via crosslink, orders will have delivery priority BULK automatically.

If Bulk material will be used for warranty calls, then return order has to be advised in WCM WEB or Spare Parts Portal with declaration of order number, ordered material number and returned material number. After 60 days without return of R\* parts, the return order will be cancelled. Therewith the Call will be forwarded to the Validation Centre to reimburse the service flat rate. See 4.1.5 for details.

### 1.1.11 Orders for 4h Service Packs

To order for 4h Service packs you have to choose in Spare Parts Portal the Product: High availability service (HV) for FUJITSU and Multivendor spare part.

### 1.1.12 Data Consistencies of Related Systems

In order to ensure consistency of data available in the Spare Parts Portal and WCM WEB data are provided from MIRO and WCM as input to a FUJITSU internal Data Comparison Tool. Focus of analysis is set on work orders and related material return orders. If despite these monitoring data differences are detected please inform WCM-support.

## 1.2 Frequently asked questions

If you have questions, during you work with WCM, please use the FAQ-Function. The FAQ Function is available via the Button “Support” or the section “Help” in the main menu.

## Frequently Asked Questions

Keywords:

Category:  Language:

**RESULT**

### What does it mean "SP Repair Scope does not contain asset"?

You have no permission to **repair** the mentioned asset. Therefore you receive this error message and are not able to create a workorder. In order to help your customer as quickly as possible, please contact your local Helpdesk to get a WO opened and assigned to a Service Partner who has got the **repair scope** for the asset in question. If you wish the settings to be changed, please contact your Country Manager. Your Country Manager can update your **repair scope** assignments, if this is needed.

#### Did this entry help You?

Yes  
No, I want to contact WCM-Support.

If the answer was not sufficient, try another keyword or contact the WCM-Support by pressing the line “No, I want to contact WCM-Support”.

## Contact WCM-Support

Contact Form	
<b>Email Address</b>	<input type="text" value="Test@user.com"/>
<b>Subject</b>	<input type="text" value="repair scope"/>
<b>Email Text</b>	<div style="border: 1px solid gray; padding: 5px;">                     Dear WCM Team,                      according to the local FTS Service Manager the repair scope was adjusted already. However I still have problems to open a call for Amilo Notebook. Details pls find attached.                       Best regards                       Test User                 </div>
<b>attachement</b>	<input type="text"/> <input type="button" value="Durchsuchen..."/> <input type="button" value="Upload"/>
<b>Name</b>	<input type="text"/>
<b>Company</b>	<input type="text"/>
<b>Phone</b>	<input type="text"/>
<b>Fax</b>	<input type="text"/>
<input type="button" value="Quit"/> <input type="button" value="Preview"/> <input type="button" value="Send"/>	

WCM-Support will answer on the e-mail account you entered in the first line. Default is taken from the data registered in the WCM WEB settings of the SP.

## 2. Registration/ Settings

Each WCM session begins with login. You will need to have your user ID and your password available when starting WCM WEB.

Account and password do not change for current WST users.

New users will receive their access data from the local FUJITSU Service Partner Management.

## 2.4 Supervisor

New: WCM WEB provides the Supervisor function.

This function can only be seen of an employee who was set up with the supervisor role.

You have to single out a special employee. Inform the Service Partner Management about that person. They will add the role Supervisor to this customer Id.

Supervisor function has the right to enable the set up of different roles for employees and technician accounts.

This will improve data security and manageability.

Please attend that sub items “order spares”, “return order” and “To claim” can’t have more rights than in item “Rework work order”.

### 3. Call entries

There exist two possibilities of creating a new Service Call/ work order:

- 1) A customer calls the Helpdesk and the Helpdesk assigns this Call to a Service Partner who is settled nearby the customer. In this case you have the choice to decide whether to accept this work order or to reject it.
- 2) You create a new work order yourself in WCM WEB after receiving a Call from your customers.

#### 3.1 Call entry from Helpdesk

New Calls which are assigned directly from the Helpdesk can be found in status "Assigned". If you click on this status you can see all assigned Service Calls.

**FUJITSU THE POSSIBILITIES ARE INFINITE**

Home | Support | Logout

The next step starts the process of ordering the needed spare part(s). This is described in chapter 4.1.1.Ordering of spare parts.

### 3.2 Self-assigned Call

Service calls which Service Partners have directly received from the customers, have to be entered directly by clicking on 'New Service Call'.

The screenshot shows the Fujitsu WCM interface. At the top left is the Fujitsu logo with the tagline 'THE POSSIBILITIES ARE INFINITE'. Below it are navigation links: Home | Support | Logout. The main content area is titled 'Service Calls (Assigned)'. It features a search bar with fields for 'Workorder / SP-Ref:', 'Serial No.:', and 'RT:'. Below the search bar is a table with the following data:

Workorder	Serial No.	Customer	Date	RT	Status	Call Number
995002281161	YKJH003008	Fujitsu Siemens Computers GmbH	18.08.2009	0	AssignedFCO	
995002281169	DNAA001001	Fujitsu Siemens Computers GmbH	21.08.2009	0	AssignedFCO	

To the right of the table are two panels: 'Actions' with a button 'New service call' (highlighted with a red box) and 'Status' with a list: Requested (0), Rejected (5), and Assigned (12).

In the next step enter the serial number of the customer’s system. (If serial number is not known in ADLER, it will not be possible to open a new service call. In these cases, please call the local FUJITSU Helpdesk.)

The screenshot shows the 'new workorder' form in the Fujitsu WCM interface. At the top left is the Fujitsu logo with the tagline 'THE POSSIBILITIES ARE INFINITE'. The form is titled 'new workorder' and contains the following fields:

- Serial No.: [Input field]
- CallDate: [Input field] 01.09.2009 [Calendar icon]
- hour: [Dropdown menu] 16
- minute: [Dropdown menu] 49

At the bottom of the form are four navigation buttons: Quit, Back, Next, and Finish.

Click on <Next> to proceed; system and warranty information as stored in ADLER will be displayed.

1. "Product information": ADLER product information
2. "Customer has paid for": Customer warranty data
3. "Service to be provided at FUJITSU Expense": FUJITSU reimbursement data

Select a Service type 'in the customer has paid for' section!

Click on <Next> to proceed.

Now the qualification and **repair scope** of the Service Partner and the selected Service Type will be checked against the customer system's warranty details. If this check fails you will be notified about the reason.

Serial number can also be blocked, if an open work order already exists or have been closed recently. For these problems please contact the local FUJITSU Helpdesk.

### 3.2.1 Customer address

If the check is alright you have to enter the customer information next. There are two possibilities:

#### 1) Customer already exists

Search for the name, if address already exists:

**Search customer**

Customer ID:

Company:

Surname:

First Name:

Town:

Create new customer:

**Customer Details**

<input type="radio"/>	Test SA south's africa street 1 12345 Pretoria	<input type="button" value="New Contact"/>
<input type="radio"/>	Testmaier Test Bgm.-Ulrich-Str. 100 86199 Augsburg	<input type="button" value="Edit Contact"/> <input type="button" value="New Contact"/>
<input type="radio"/>	Fujitsu Siemens Computers GmbH test Now2 Gladbecker Straße 7 40472 Düsseldorf	<input type="button" value="New Contact"/>

Select the customer and confirm with button <Next>.

If the customer's address changed, it is possible to correct the addresses of customers created by partner.

2) Customer is new/ does not exist so far

Add a new address. Tick "Create new customer" check box and click <Next>.

In the next window you have to enter all necessary address details of the new customer and at least one telephone number.

All fields marked red are mandatory and have to be filled in completely. They are also used for feedback and reclamation purposes.

**Search customer**

Customer ID:

Company:

Surname:

First Name:

Town:

Create new customer:

Click on <Next> to proceed.

new workorder

---

YKDS038205

**New Customer**

<b>Salutation:</b>	Ms <input type="button" value="v"/>	
<b>Title:</b>	<input type="button" value="v"/>	
<b>Company:</b>	<input type="text"/>	
<b>Surname:</b>	Gadletz	
<b>First Name:</b>	Christine	
<b>Department:</b>	<input type="text"/>	
<b>Street:</b>	Mies-van-der-Rohe-Strasse 8	
<b>Post Code, Town:</b>	80807	München
<b>Country:</b>	Deutschland <input type="button" value="v"/>	
<b>Phone Private:</b>	08952525252	
<b>Phone Business:</b>	08962626262	
<b>Fax private:</b>	<input type="text"/>	
<b>Fax business:</b>	<input type="text"/>	
<b>Mobile:</b>	<input type="text"/>	
<b>Email 1:</b>	<input type="text"/>	
<b>Email 2:</b>	<input type="text"/>	
<b>accessible under:</b>	<input type="text"/>	

A "Warning list" check is opened:

new workorder

---

YKDS038205

**Export Monitoring - Warning List**

Name	Town	Country
<span style="color: red;">Chr</span> SHANTHAKUMAR, ARUNACHALAM	Tehran	Iran
<span style="color: red;">Chr</span> STABELLE AUNG	Culiacan, Sinaloa	Mexico
<span style="color: red;">Chr</span> STOPHER AUNG	Culiacan, Sinaloa	Mexico
<span style="color: red;">Gad</span> S.A.	Culiacan, Sinaloa	Mexico
<span style="color: red;">Chr</span> STINA AUNG	Culiacan 80129	Mexico

Yes, the customer is registered in the warning list  
No, the customer is not registered in the warning list.

Check this list:

If your customer is not in the list then confirm "No, customer is not registered in the warning list".  
If your customer is in the list, please contact the FUJITSU Export Control: Mr. Helmut Schaperdot  
<mailto:helmut.schaperdot@ts.fujitsu.com>/ Tel.: +49 (5251) 525-1920

Processing of the Service Call is now blocked until further clarification with Export Control Department.

Then the Customer ID will be created:

The screenshot shows the top part of the application interface. At the top left is the Fujitsu logo with the tagline "THE POSSIBILITIES ARE INFINITE". To the right is a grey header bar with the text "new workorder". Below this is a horizontal line and the identifier "YKDS038205". Below that is a grey bar with the text "new customer number". Underneath is a form with two fields: "Customer:" with the value "Gadletz, Christine" and "Customer ID:" with the value "2302018372". The "Customer ID" field is circled in red.

3) Editing of contact name in existing customer address

Instead of setting up a new customer address it is possible now to edit a specific contact name. This will help maintaining customers with bigger facilities and organisations.

The screenshot shows the "Search customer" form and a list of customer results. The form has fields for "Customer ID:", "Company:", "Surname:" (containing "Gadletz"), "First Name:", "Town:" (containing "München"), and a "Create new customer:" checkbox. Below the form is a list of customer entries. The first entry is selected and highlighted. To the right of the list are buttons for "Edit Contact" and "New Contact".

Numbered callouts are present:
 

- 1: Points to the "Surname:" field containing "Gadletz".
- 2: Points to the selected customer entry in the list.
- 3: Points to the "Edit Contact" button.
- 4: Points to the "Location" field in the expanded view of the selected customer, which shows the address: "Mies-van-der-Rohe-Strasse 8, 80807 München, Deutschland".

At the bottom of the screenshot, the "new workorder" header and "YKDS038205" identifier are visible again.

**FUJITSU** THE POSSIBILITIES ARE INFINITE

### 3.3 Field change order

With WCM it is possible to support recalls. The list of serial numbers affected can be loaded. WCM will identify related systems during a call; suggest spare parts and grant additional flat rates if necessary. The WCM FCO function will not replace the FUJITSU FCO process but support it. Thus for all systems in a normal call, it is assured the necessary FCO is executed as well.

The exact procedure has to be agreed with Product Operation case by case. The screenshots attached only can give an impression how it looks like in the system if a FCO is involved.

If a Field Change Order is assigned, the status changes to "AssignedFCO"

Brief Field Change Order Information, e.g. with reference to related FTS Service Bulletins appear.

Specific Spare Part Proposals are added.

Additional FCO specific labour flat rates might be added. However: This is modified by the Validation Center if:

- 1) FCO failure is identical with requested work order
- 2) the requested service type already covered on site

### 3.3.1 Different priority levels of FCO

There are different priority levels of FCOs. We distinguish into 2 different types of FCOs - FCO Type A and FCO Type A1:

FCO Type A describes the critical FCOs which have to be executed and handled by the specific service providers (SP) in any case, even if the suggested service type (ST) during the call entry at the Help Desk was CRU initially. FCO Type A1 describes the minor critical FCOs. Unlike the FCO Type A, the FCO Type A1 is ignored in case the service type is CRU.

In most countries the CRU process is enabled for the Help Desk only where the described logic above is fully supported in Support Assistant. Only in some countries the Service Type CRU is enabled for WCM WEB self assigned claims.

### 3.3.2 Different priority levels of FCO

For countries where the Service Type CRU is enabled for WCM WEB self assigned claims the following section describes how this functionality is integrated into the WCM WEB claim handling workflow.

### 3.3.2.1 FCO is of type A and the service type is “CRU”

In case the FCO is of type A and the service type is “CRU”, the claim will be rejected with the following reject reason: CRU rejected – FCO pending – contact Help Desk.

In case multiple FCOs are identified for one work order and the types of the FCOs are different and there’s one of the type A and the service type of the claim is CRU, the Service Type CRU is rejected as well.

After the call is opened with service type different from service type CRU, the workorder is assigned and the field change order information is displayed.

**new workorder - Fujitsu Technology Solutions**

**new workorder**

YK8V001302

The following FCO have been found for YK8V001322:

- FCO: In case of instable system function, sporadic system freeze, overheating or similar symptoms please refer to Support Bulletin SB-M-07052-1 prior to swap any parts. Please also check the soldering at the heat pipe.

**Attention**

There is a FCO of Type A! This will prevent the creation of a CRU workorder.

Search for Workorder / Serial

Workorder / Serial No.

Adler

Enter the Serial No.

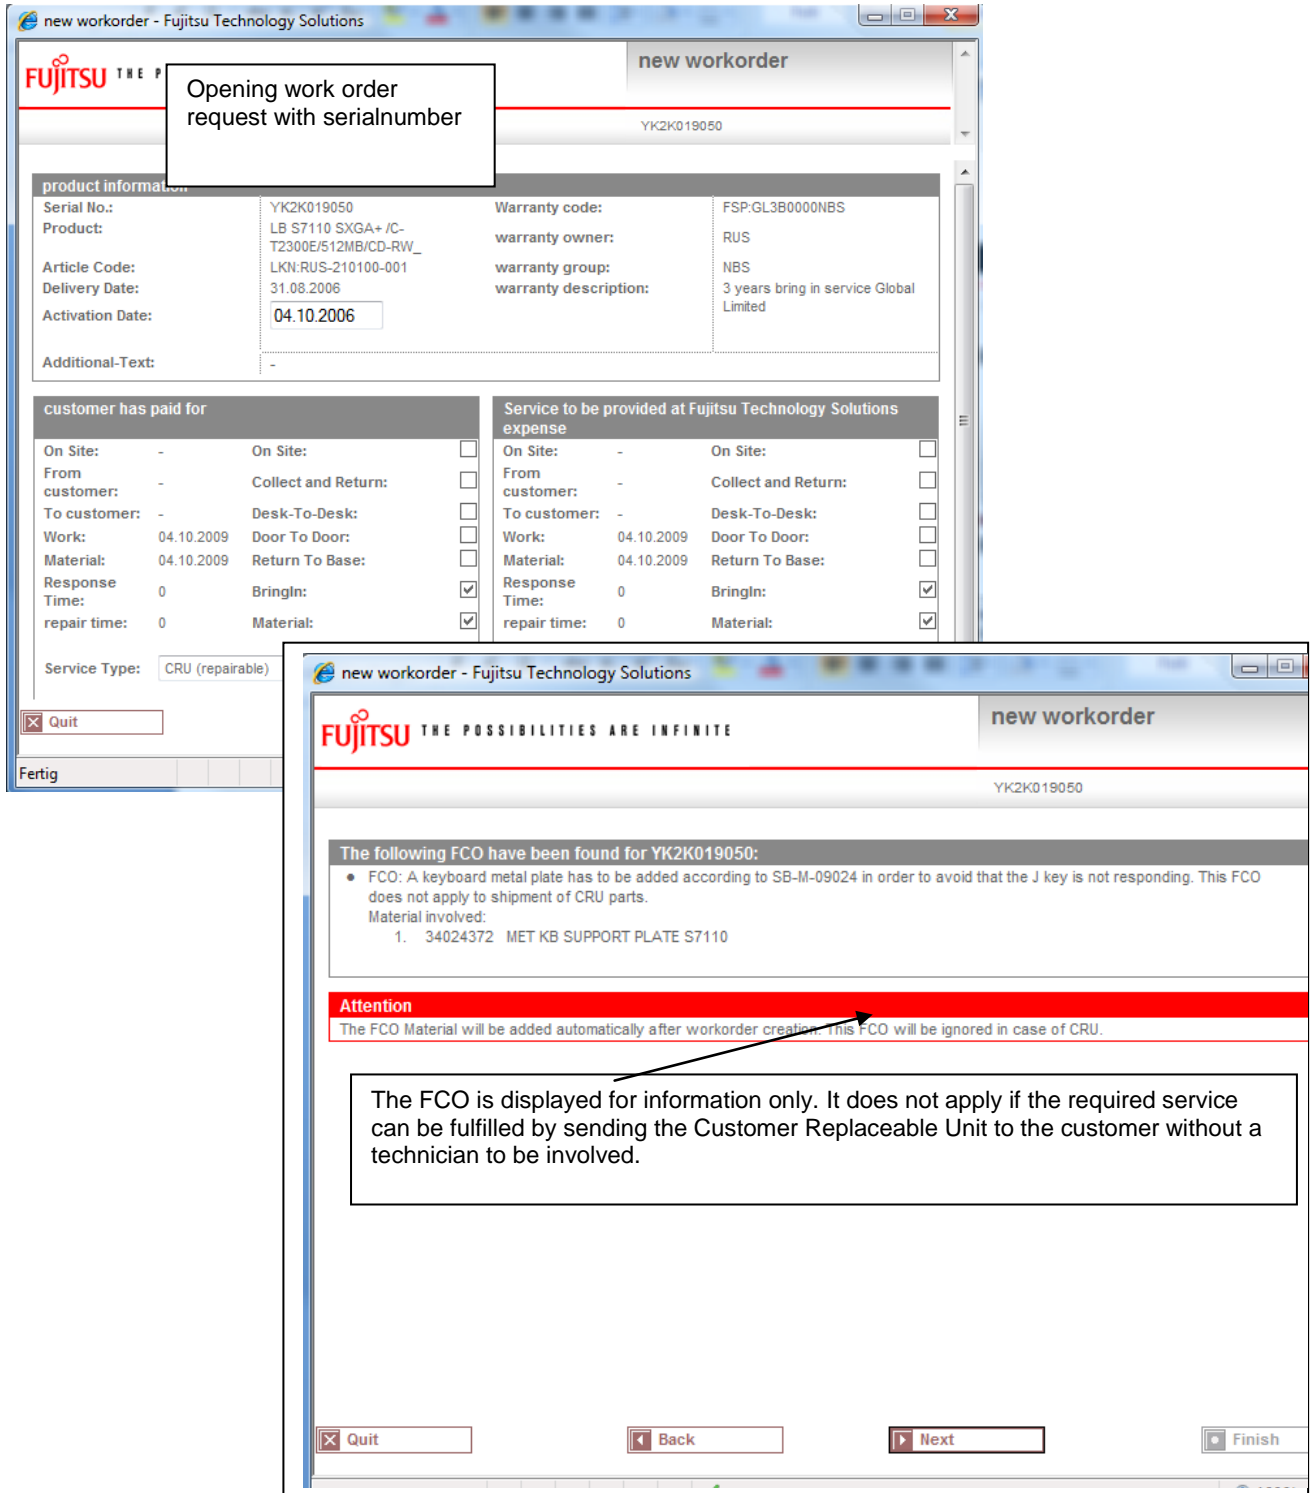

The status is changed and the FCO information is displayed.

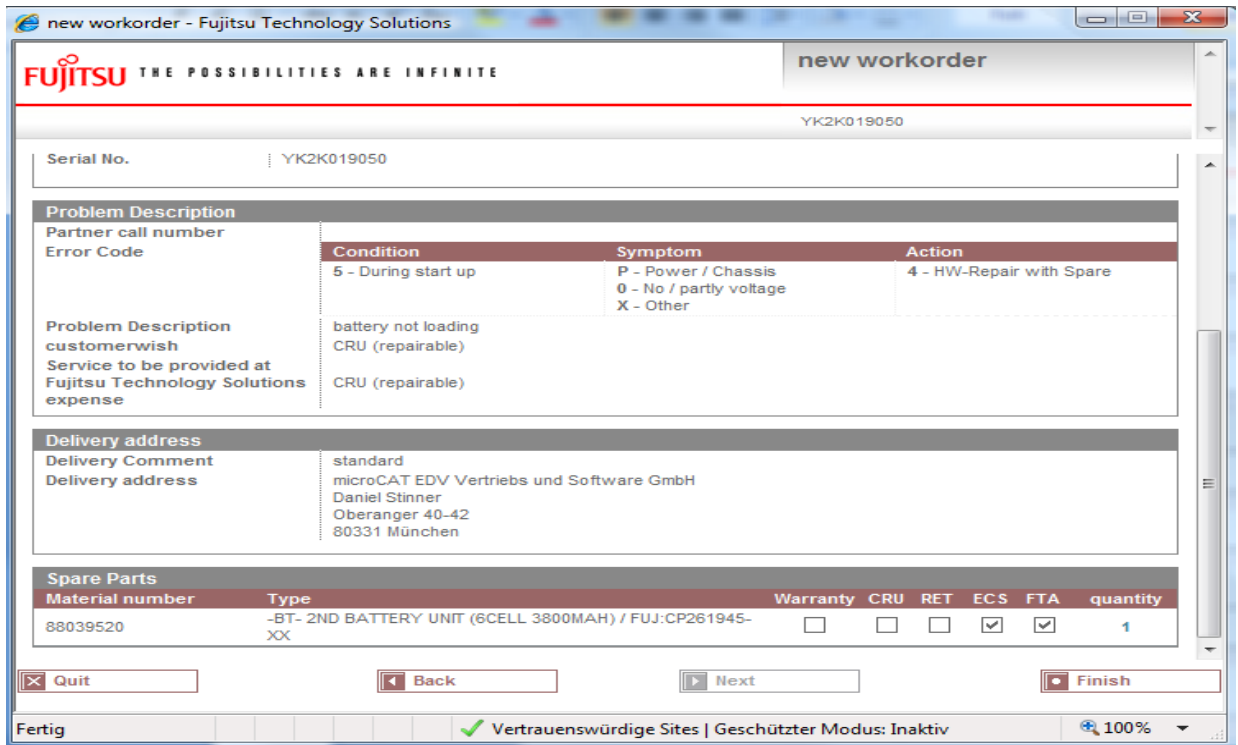

As usual, subsequently the work order with the assigned FCO has to be accepted by the Service Partner again.

### 3.3.2.2 FCO is of type A1 and the service type is "CRU"

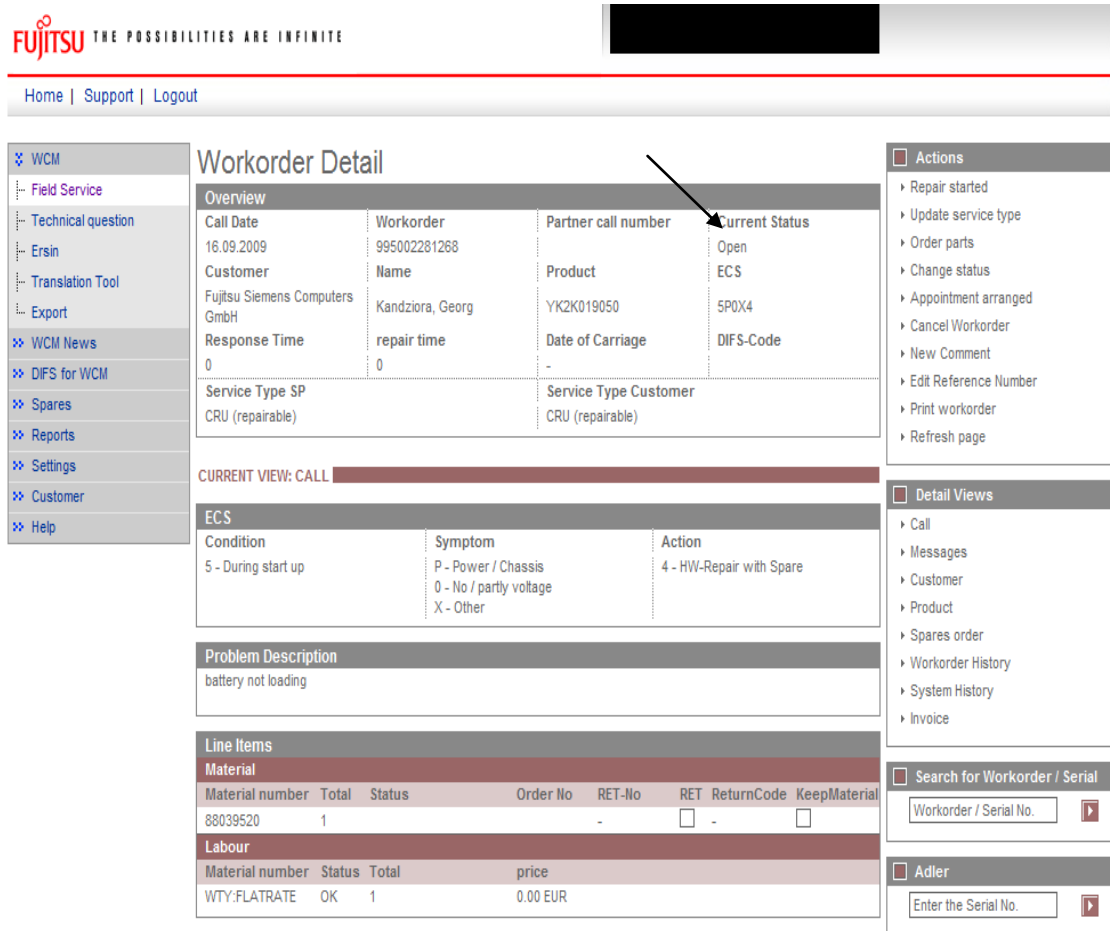

In case the FCO is of type A1 and the service type is "CRU", the FCO will be ignored and the claim will be handled like a normal work order without FCO.

However the FCO information is displayed after the work order request is sent. It disappears after the material order identifies the part is a CRU part.

After the necessary spare parts are ordered, the status is changed to "Open". No FCO is assigned.

### 3.3.2.3 FCO is of type A or A1 and the service type is not equal to CRU

In case the FCO is of type A or A1 and the service type is not equal to CRU, now the FCO information is displayed during the workorder request already and subsequently is processed by the selected service provider as usual. No further change to the existing process.

The screenshot shows the 'new workorder' page for Fujitsu Technology Solutions. The workorder ID is YK8V001328. A message states: 'The following FCO have been found for YK8V001328: FCO: In case of instable system function, sporadic system freeze, overheating or similar symptoms please refer to Support Bulletin SB-M-07052-1 prior to swap any parts. Please also check the soldering at the heat pipe.' Below this is an 'Attention' banner: 'There is a FCO of Type A! This will prevent the creation of a CRU workorder.'

The 'Workorder Detail' section shows the following information:

Overview			
Call Date	Workorder	Partner call number	Current Status
16.09.2009	995002281271		AssignedFCO
Customer	Name	Product	ECS

The 'CURRENT VIEW: CALL' section shows the following details:

Condition	Symptom	Action
5 - During start up	B - Board / Ra 1 - Error mess 2 - Memory / C	

The 'Problem Description' is: 'Not enough RAM detected while booting'. The 'Fco Description' is: 'FCO: In case of instable system function, sporadic system freeze, overheating or similar symptoms please refer to Support Bulletin SB-M-07052-1 prior to swap any parts. Please also check the soldering at the heat pipe.'

The 'Line Items' section shows:

Material							
Material number	Total	Status	Order No	RET-No	RET	ReturnCode	KeepMaterial
34006911	1	Proposed		-	<input checked="" type="checkbox"/>	-	<input type="checkbox"/>

Labour			
Material number	Status	Total	price
WTY:FLATRATE	OK	1	87.20 EUR

A callout box points to the 'AssignedFCO' status field in the overview table, containing the text: 'The status is changed and the FCO information is displayed.'

As usual, subsequently the assigned FCO has to be accepted by the Service Partner again.

### **3.4 SWAP Process**

For systems like Blade Frame or Monitor, the whole unit is replaced during the break fix. Immediately after the exchange of the defective system, the warranty data is transferred to the asset data of the Replacement System. Warranty Codes, SLA and day of first use date from the defective Call Entry SNR sold to the customer originally are moved to the Replacement Serial Number (SWAP). Thus the warranty entitlement of the customer keeps updated.

#### **Required assistance by the Service Partners**

For systems marked as swappable in the asset data the information about the Replacement System Serial Number needs to be entered in WCM by the Service Partner. Entry fields are provided in WCM WEB to be confirmed or updated. Adaptations of the messages in the B2B process are explained below.

#### **3.4.1 Function**

The work order in WCM is based on the SNR the customer communicates. As soon as the system is swapped successfully the work order is updated by two dates:

- the confirmed or corrected Serial Number of the actual collected defective system
- the Replacement Serial Number

If the actual SNR of the defective system differs from the SNR the customer communicated with the call, the work order is processed with a different SNR immediately after the WCM Web User entries or the B2B Partners messages corrected the call assignment record. The correction is done during the To Claim process only. All three Serial Numbers, the SNR from the call entry, the corrected defective system SNR and the Replacement SNR will be placed in the WCM asset data. So the swap is traceable in WCM.

The ADLER data of the Replacement SNR takes over the Warranty Data which has been recorded to the defective System Serial Number in ADLER.

#### **3.4.2 Process steps**

A swap only is requested if the work order carries a SWAP Flag. Then, the Claim Update during the To Claim Action requires the additional entry of the Replacement SNR. It subsequently is updated in the ADLER data base by the warranty data of the Call Entry SNR. In some cases the update of ADLER is delayed as a manual confirmation of the local Service Management is necessary. This is the case if the Replacement System SNR is registered in the asset data base ADLER with a wrong Warranty Code, i.e. different to FSP:SWAP.

##### **3.4.2.1 Work order open**

The WO is opened on the Call Entry SNR1. Based on the Call Entry SNR1 warranty record the Swap is taking place. Even so the Call Entry SNR1 could turn out to be misspelled by the customer. This requires an update in the workflow of the warranty claim.

##### **3.4.2.2 Replacement**

SNR2 is the Replacement SNR (SWAP) of the swapped asset. The Replacement SNR2 is entered by the SP or repairer.

##### **3.4.2.3 Confirmation of defect SNR**

As mentioned previously, after the repair is done a 3<sup>rd</sup> SNR could take place. This is the defect SNR which is identified by the Service Partner or Repair Center managing the swap stock. If the defect SNR3 is different to the Claim Entry SNR1, the defect SNR3 overwrites the Call Entry SNR1. The Service Partner sends the correct defect SNR during the ToClaim Action in exchange for the original Call Entry SNR the customer communicated.

### **3.4.2.4 To Claim the Workorder**

After the Call Entry SNR is confirmed and the Replacement SNR is entered in WCM the work order is claimed. The exceptionally scenarios may apply - see chapter 3.4.5

### **3.4.3 Exceptions where no Swap Data need to be provided**

Although the system is marked as swappable in the asset data, there are some exceptions the work order is not processed as Swap:

#### **3.4.3.1 Desk to Desk Monitor Exchange in Germany**

In Germany for Service Type Desk to Desk two work orders are opened by the Help Desk in parallel. The first one for the on site Service Partner (Desk to Desk) and another one for the Logistics Partner (Door to Door). For Service Type Desk to Desk no update of the Call Entry SNR1 by the actually identified SNR3, nor an update of the work order with the Replacement SNR2 (SWAP) is required. Both informations are retrieved from the parallel work order of the Logistics Partner. As the Logistics Partner owns the swap stock information and forwards the defective system to the repair centre. WCM differentiates the work orders automatically.

#### **3.4.3.2 Forwarded work orders**

If in the country organization the workorder forward process is implemented, i.e. a Service Partner is defined who can receive work orders from WCM WEB User Accounts of other Service Partners, the WCM WEB User Account who opened the claim is not requested to deliver the Swap data. Only the receiving WCM Service Partner account has to provide the Swap data. WCM distinguishes the status of forwarded work orders automatically.

#### **3.4.3.3 Named repair for Displays with Door to Door Service**

Despite the related monitor product family normally is maintained by Door to Door Service, in single cases the customer requests a named repair and gets his original system back after repair. Those repair orders are opened in WCM with Service Type Collect & Return. The Swap applies, but as the Call Entry SNR1 and Replacement SNR2 are identically, no Swap of the warranty data is executed. WCM will distinguish automatically, if Service Type is C&R and Call Entry SNR1 is equal to Replacement SNR2. The Swap Flag is removed from the work order data in WCM.

#### **3.4.3.4 Repair of Blades**

Repair on Blade Systems require a SWAP process if the whole unit is replaced. This is the case if the failure unit is the Blade Master or Blade Slave board which is combined to the housing. However a Blade failure might be fixed by replacing a modular component e.g. the RAM. The unit is not replaced and the Call Entry SNR1 does not change. The Service Partner signifies this by simply entering the Call Entry SNR1 for the Replacement SNR2 once again.

### **3.4.4 WCM WEB information**

#### **3.4.4.1 SWAP Example 1 – whole Blade unit was swapped**

#### **Workorder open**

During a claim is opened in WCM WEB, WCM checks if the related system can be exchanged completely for break fix, i.e. the system is swappable or not. If the system is swappable in the Workorder Details an Additional Information line is displayed to inform the Service Partner the SNR of the defective and the SNR of the replacement system need to be recorded in the subsequent WCM claim process.

SNR entry of replacement system

The replacement system can be ordered and the repair started and finished is confirmed in WCM as usual. When the work order is claimed, the system SNR of the Claim Entry is displayed. If the actual defect system SNR differs from the Claim Entry SNR the Help Desk had recorded from the customer call earlier, the Claim Entry SNR needs to be overwritten.

**Change status**

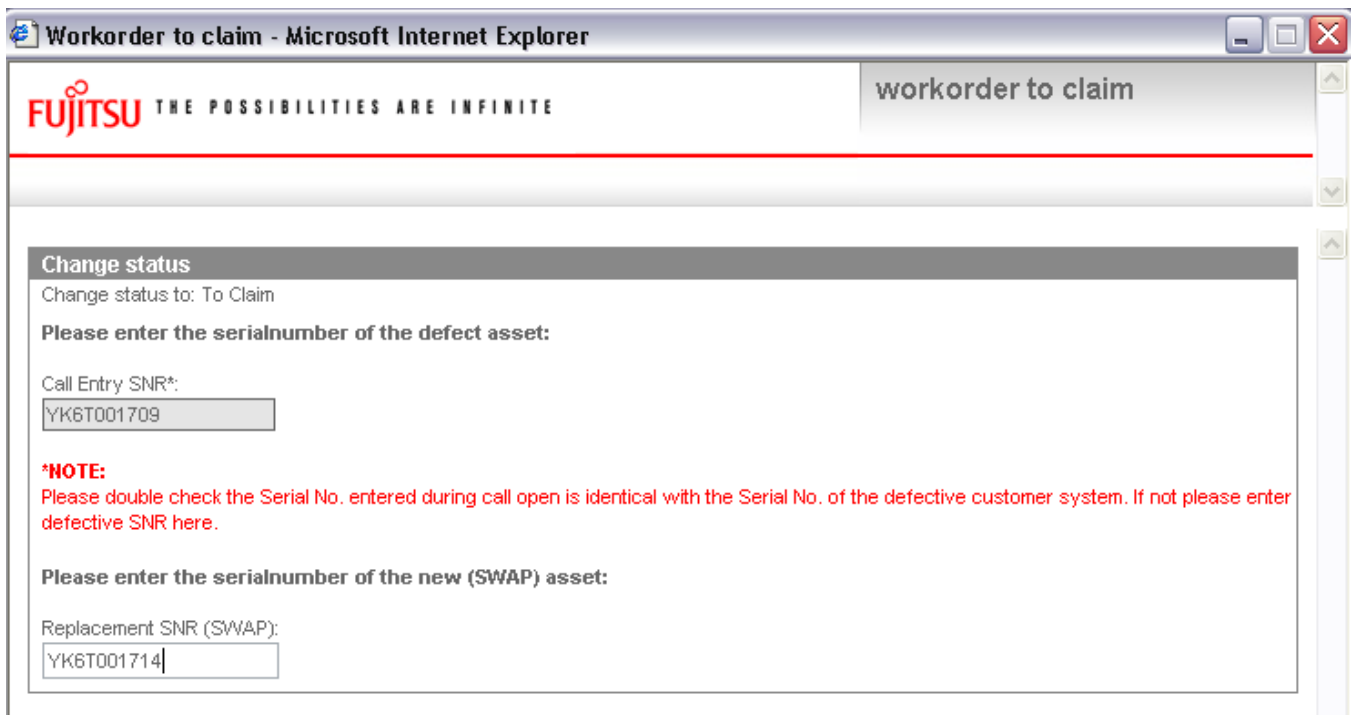

Change status to: To Claim

**Please enter the serialnumber of the defect asset:**

Call Entry SNR\*:

**\*NOTE:**  
 Please double check the Serial No. entered during call open is identical with the Serial No. of the defective customer system. If not please enter defective SNR here.

After confirmation by pressing the button Finish, a second entry is opened. Here the serial number of the Replacement System is required.

Workorder / Serial No.

Adler

Enter the Serial No.

### 3.4.4.2 SWAP Example 2 - SNR of defect unit was captured incorrectly

For the process it is very important, the defect serial number is recorded correctly.

Claiming the work order, first of all the Serial Number of the defective System is to be confirmed. In case the Serial Number the Help Desk recorded from the customer call differs from the actual defect unit, it needs to be corrected now. WCM permits to correct the SNR in the ToClaim action entry. The overwritten Claim Entry SNR is stored in a text field in order to trace the sequence of events in this work order.

Example: SNR1 YE8L022326 claimed by customer, SNR2 YE8L022271 shipped as replacement system from Swap Stock, SNR3 YE8L022327 actually sent into repair:

The screenshot shows the 'Workorder Detail' page in the WCM system. The main content area displays an overview table with the following data:

Call Date	Workorder	Partner call number	Current Status
25.03.2009	995002270148		RepairSuccessful
Customer	Name	Product	ECS
Fujitsu Siemens Computers GmbH	Kandziora, Georg	YE8L022326	2D316
Response Time	repair time	Date of Carriage	DIFS-Code
0	0		
Service Type SP	Service Type Customer		
Door to door	Door to door		

A callout box points to the 'Product' field (YE8L022326) with the text: "Claim Entry SNR named by customer at the Help Desk."

The 'Workorder to claim' pop-up window shows the 'Change status' section with the following fields:

- Change status to: To Claim
- Please enter the serialnumber of the defect asset:
  - Call Entry SNR\*:
- \*NOTE: Please double check the Serial No. entered during call open is identical with the Serial No. of the defective customer system. If not please enter defective SNR here.
- Please enter the serialnumber of the new (SWAP) asset:
  - Replacement SNR (SWAP):

As the Serial Number the Help Desk recorded from the customer call differs from the actual defect unit the Service Partner corrects the entry.

The corrected Entry SNR and the Replacement SNR are recorded.

This screenshot shows the 'Workorder to claim' pop-up window with the corrected serial numbers entered:

- Call Entry SNR\*:
- Replacement SNR (SWAP):

After the correct data entry in WCM the workorder is processed with the actual defect system SNR.

WCM WEB:

### 3.4.4.4 SWAP Example 4 - Monitor was repaired not swapped

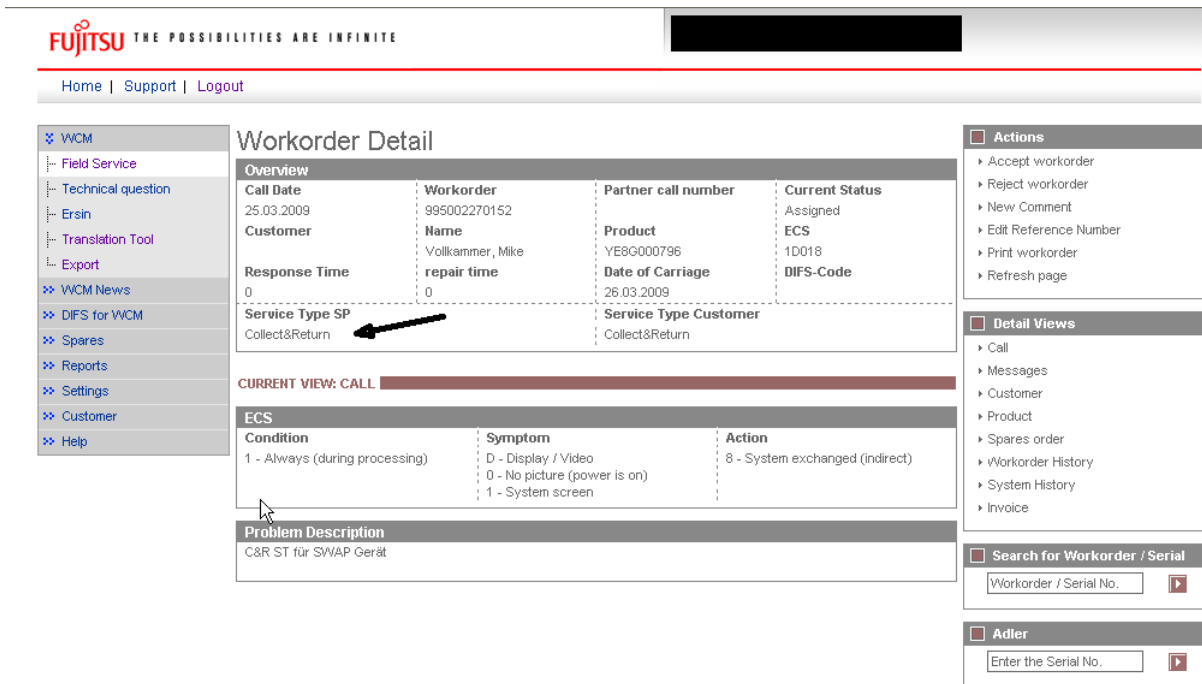

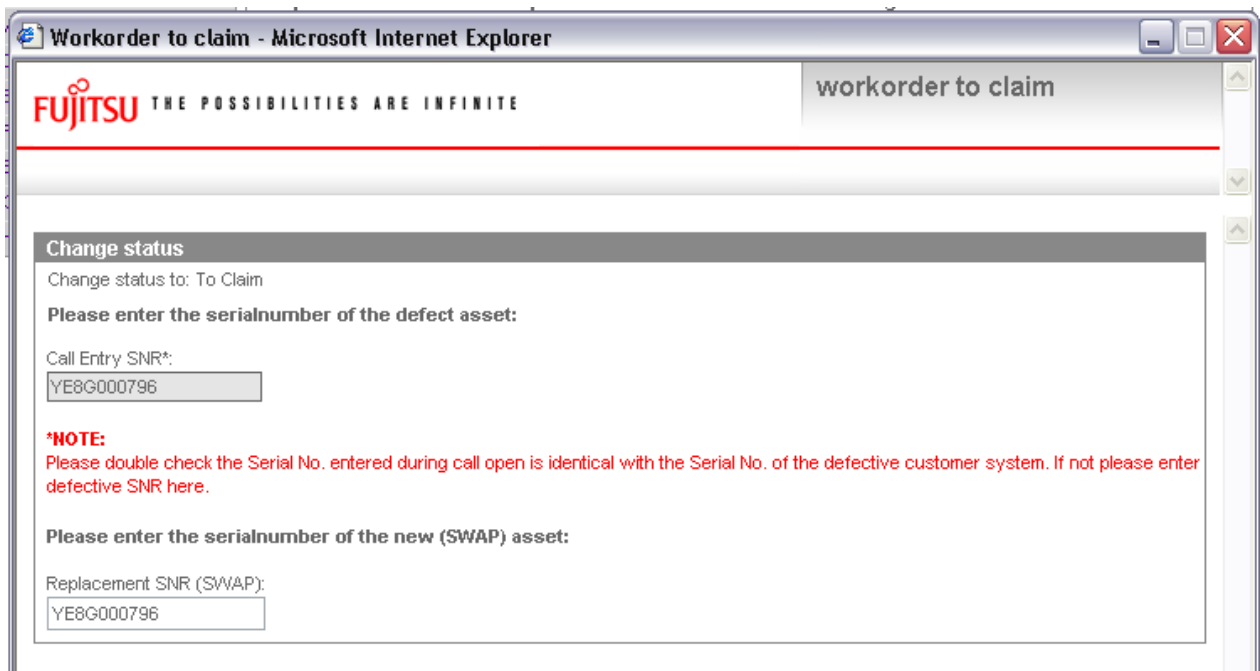

Occasionally the customer wants to avoid an exchange of his defective monitor. Being aware, he gives up some service level, he asks for repair of his defective unit. According to this request, the Help Desk opens the claim with service type Collect & Return. In this case no swap process is in place. The same unit is returned to the customer.

However as the principle service concept for the system is swap, the work order carries the swap flag and additional information is displayed to remember both Serial Numbers in the further process.

However the unit is not replaced and the Claim Entry SNR does not change. The Service Partner signifies this by simply entering the Entry SNR into the field replacement SNR once again. WCM will permit the repetition of the same SNR only for warranty claims with Service Type Collect & Return.

The work order is assigned by the Helpdesk with Service Type Collect & Return:

When the work order is claimed and the replacement serial number is to be entered, for Collect & Return Service the same Call Entry SNR is accepted.

Subsequently the Swap Flag will disappear from the claim. The indication of the system exchange is no longer displayed in the additional information section.

### 3.4.5 To Claim the Work order

After the Call Entry SNR is confirmed and the Replacement SNR is entered in WCM the work order is claimed. The following exceptionally scenarios may apply:

#### 3.4.5.1 Replacement SNR not in ADLER

If by any reason the Replacement System SNR is not recorded in ADLER, a ToClaimError appears:

“SWAP Error”

“ADLER error during Swap”

The local Service Partner Management shall be informed to update the delivery data in ADLER. The work order can be claimed again after the ADLER data is complemented.

#### 3.4.5.2 Warranty of Replacement SNR is not Zero

If the the Replacement Serial Number is recognized by ADLER but the assigned Warranty Code is not equal to “FSP:Warranty”, the Local Claim Approver in the Service Partner Management needs to update ADLER manually. Before the update the LCA will double check with the Repair Centre or Service Partner if the SNR which was recorded is correct and update the ADLER data accordingly.

The payment of the claim does not depend on the ADLER update decision but will be delayed until the ADLER decision is made.

#### 3.4.5.3 Assets are incompatible

If the Replacement Serial Number apparently does not fit to replace the defective system, e.g. Notebook for Monitor, a ToClaimError appears:

“SWAP Error”

“Assets are incompatible for Swap”

### 3.4.6.2 SWAP Pool inventory

Units in the spare part stock, repaired or new material ready for exchange are recorded in ADLER with Zero Warranty. These assets also carry the SWAP Flag.

### 3.4.7 Monitor Service Concept – Collect & Return Display

April 1<sup>st</sup> 2009 a new Monitor repair concept was introduced: Collect & Return Display. Monitor this Service applies to are not exchanged but the repaired system is returned to the customer. The swap process is not in place.

The ADLER values distinguish from Door to Door and normal Collect & Return. The warranty values are FromCustomer/ToCustomer/Labour. The asset has no swap flag. See example from ADLER below:

The screenshot shows the Fujitsu Adler web interface. At the top, there are logos for Fujitsu, 'test', and 'adler<sup>2</sup>'. Below the navigation bar, the page title is 'YE8G000356 - Warranty / Service'. On the left, there is a 'SELECT' dropdown menu with 'device serialnumber' selected, and a text input field containing 'YE8G000356' with a 'Submit' button. A sidebar on the left lists various warranty information options like 'partlist', 'component details', etc. The main content area displays the following details:

- Type:** AMILO Display L 3190T
- Family code:** YE8G AMILO LL 3190T
- Part number:** S26361-K1301-V180
- weight (gram):** [blank]
- Material number:** 000000010600969089
- Last update:** 3/25/2009
- Factory delivery date:** 10/21/2008
- Date of first use:** 11/20/2008
- history first use date:** [blank]

Below this is the 'Customer warranty / service' section with the following details:

- Code:** FSP:GN3H000STDWDYE
- Description:** 3 years Collect & Return Service Display, 5x9, valid in Europe, Africa and Middle East
- Area:** E - FSC Limited Warranty
- Owner:** D
- Group:** DYE - Display Entry
- Reaction time (h):** 0
- Repair time (h):** 0
- warranty days:** WD
- warranty time:** B

A table shows dates for different service types:

	ON-SITE	TRANSPORT From customer	TRANSPORT To customer	LABOUR	MATERIAL
	-	11/20/2011	11/20/2011	11/20/2011	-

Below the table is the 'Detail information (in months)' section with a table:

	Code	OS	FC	TC	LA	MA	PRODUCER	OWNER
BASIC	-	-	-	-	-	-	-	-
ADD. WAR-INFO	BW_no_BOM	0	0	0	0	0	u	ukm
STANDARD	FSP:GN3H000STDWDYE	0	36	36	36	0	l	fsc sbd
TOPUP	-	-	-	-	-	-	-	-
EXTENDED	-	-	-	-	-	-	-	-

At the bottom left, there is a copyright notice: © 1999-2009 Fujitsu Technology Solutions.

Service Type Door to Door is a higher service and cannot be selected for those Displays.

The screenshot shows the Fujitsu WCM web interface. At the top, there is a navigation bar with 'Home | Support | Logout'. Below it, the page title is 'Service Calls (Assigned)'. The main content area displays details for a workorder with serial number 'YE8G000356'. The details are organized into sections:

- product information:** Serial No., Product, Article Code, Delivery Date, Activation Date, and Additional-Text.
- customer has paid for:** On Site, From customer, To customer, Work, Material, Response Time, and repair time.
- Service to be provided at Fujitsu Technology Solutions expense:** On Site, From customer, To customer, Work, Material, Response Time, and repair time.
- Service Type:** Collect & Return Displays.

On the right side, there is an 'Actions' panel with a 'New service call' button and a 'Status' panel showing various call statuses like 'Requested (1)', 'Rejected (12)', etc. Below the status panel are search fields for 'Workorder / Serial' and 'Adler'. At the bottom, there are buttons for 'Quit', 'Back', 'Next', and 'Finish'.

## 4. Call Processing

### 4.1 Ordering Spare Parts

#### 4.1.1 Ordering of spare parts at FUJITSU with WCM WEB (standard)

##### 4.1.1.1 Material selection

It is only possible to order at most 5 pieces per Call.

For an order with several parts you will receive only one order number.

If you order only one piece per Call, it automatically will be an ADEX-Order (detailed explanation see chapter 1.1.5), e.g. the order will be created and in parallel also the return order.

You can order the suggested part(s) or search for specific material nos. With a click on the button “Change List” the complete material list is displayed.

With the buttons “plus” and “minus” it is possible to define the quantity.

(Explanation of abbreviations “LSF”, “RET”, etc.: see chapter 7.3, or rest with the mouse on them and short explanation screens will arise.)

**FUJITSU** THE POSSIBILITIES ARE INFINITE

As long as the work order is not claimed additional spare part orders are possible.

Click on <Next>

In the next step you have to enter all further settings for your order:

### 4.1.1.2 Delivery Type selection

#### Delivery Comment:

**Standard:** Delivery will be processed according to the delivery lead times as stated in the Service Logistics Manual.

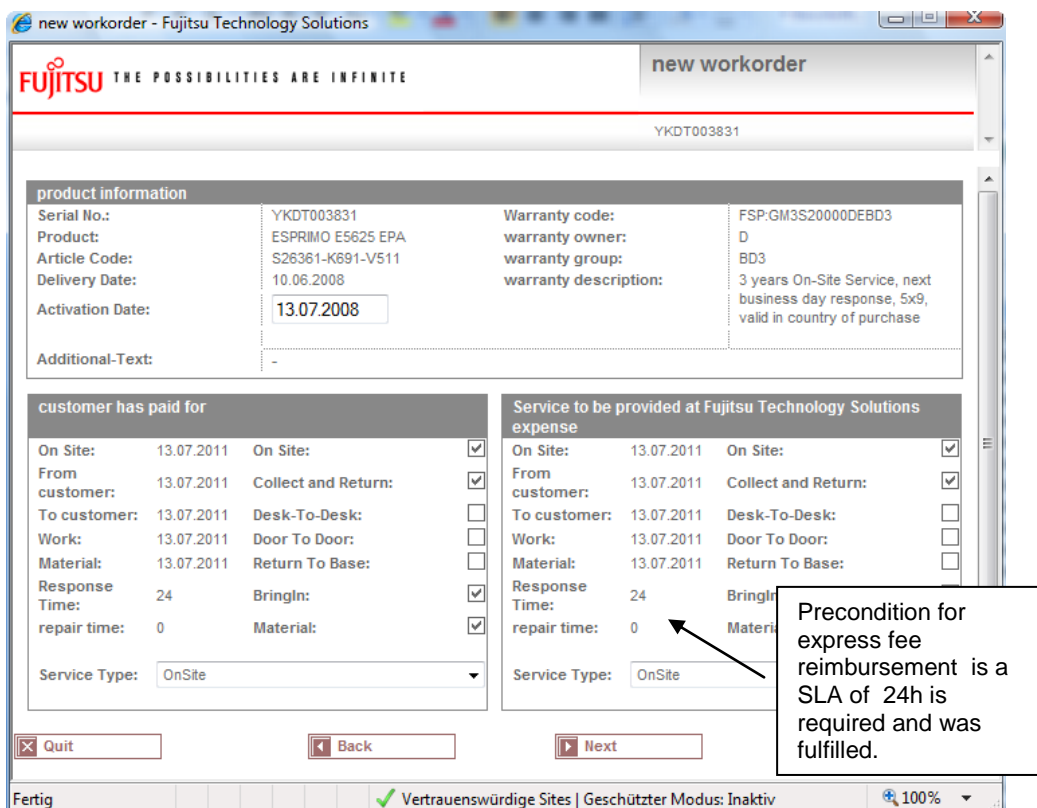

**Urgent:** Delivery will be processed according to the delivery lead times as stated in the Service Logistics Manual. <http://partners.ts.fujitsu.com/com/service/general/service-spares/manual>

**Important:** The additional transport costs for urgent delivery are charged to you! The Spare Parts Portal order will show this additional charge like a part number and indicates the costs. In some countries, like Germany, the SP can currently request an express delivery, when ordering a spare part via WCM. The SP is charged for this express order fee by Service Parts Logistics. The authorized SP in defined countries gets reimbursed the express charge during the normal WCM invoice process, if the Service Type accepted by FUJITSU is at least an OnSite 24hrs performance ST.

Detailed delivery terms are shown in the Service Logistics Manual at <http://partners.ts.fujitsu.com/com/service/general/service-spares/manual>

The reimbursement of the express fee is enabled country specific. At present only Germany is activated.

### 4.1.1.3 Express charges in WCM WEB

new workorder - Fujitsu Technology Solutions

**FUJITSU** THE POSSIBILITIES ARE INFINITE

new workorder

YKDT003832

Options

Delivery Comment

urgent

Where would you like the spare parts to be delivered

servicepoint

Customer

Delivery address

free address

You selected the following spares.

Material number	Description	LSF	Entry Date	Total	
<input checked="" type="checkbox"/> 34005979	HDD 160GB SATA 300 7.2K / WDC:WD1600AAJS	<input type="checkbox"/>	16.09.2009	1	MIRO

Set all to MIRO

In defined countries the delivery type „urgent“ triggers express delivery. Hence express charges are invoiced by FUJITSU Service Parts Logistics.

After the claim is accepted by the Validation Center the express charges are added to the warranty flat rate.

#### 4.1.1.4 Invoice /-proposal form with Express Charge

At the detail invoice the Express Charge is listed separately.  
 At the summary invoice the Express Charges are included in the totals.

#### 4.1.1.5 Delivery address selection:

Where would you like the spare parts to be delivered

<b>servicepoint</b>	<input checked="" type="radio"/>
<b>Customer</b>	<input type="radio"/>
<b>Delivery address</b>	<input type="text" value="Please Choose"/>
<b>free address</b>	<input type="radio"/>

*Service point:* Address of Service Partners site

*Delivery address:* All additional delivery addresses, which are equal with the addresses entered in the Spare Parts Portal.

To set up new addresses please refer to <mailto:SparesDebitor.Masterdata@ts.fujitsu.com>

Due to export control regulations the customer address or a free delivery address is only available for deliveries within Germany.

Where would you like the spare parts to be delivered

<b>servicepoint</b>	<input type="radio"/>
<b>Customer</b>	<input type="radio"/>
<b>Delivery address</b>	<input checked="" type="radio"/> <input type="text" value="Please Choose"/>
<b>free address</b>	<input type="radio"/>

#### Supplier:

**FUJITSU MIRO:** Spare parts are delivered from FUJITSU warehouse.

**Own stock:** You have the required spare part in your own stock. Ordering process ends after you confirm "own stock". (🕒 Process will be shown in [chapter 4.1.2](#))

**Where would you like the spare parts to be delivered**

servicepoint	<input type="radio"/>	
Customer	<input type="radio"/>	
Delivery address	<input checked="" type="radio"/>	Please Choose
free address	<input type="radio"/>	Please Choose

**Supplier** ↓

You selected the following spares.

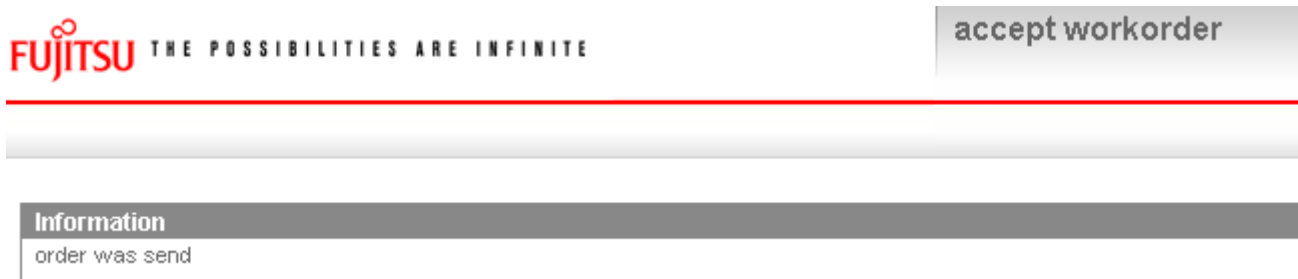

Click on button <Next> to proceed.  
 In the following mask all order settings can be verified.

Click on <Finish>

**4.1.1.6 Order confirmation**

An information screen confirms the spare part is ordered  
 How this is confirmed depends on the way you have reached the ordering process

A): Material Orders for already assigned work orders, i.e. HD assigned claims or self assigned claims which are in status further than requested:

B): Self assigned claims where the order was entered together with the call open:

Click on Refresh page to see the order confirmation. Current work order status subsequently changes into "Open" and after spares application confirmed the order the status changes into "SparesOrdered".

		<input type="button" value="START ORDERTRACKING"/>
	<input type="button" value="DELETE INPUT"/>	

#### 4.1.2 Using Spares of own stock

You can use spare parts from your own stock (original FUJITSU parts) if wanted and available.

The processing in WCM WEB begins like the normal spare part ordering process. Therefore please start your WCM entries as described in [chapter 4.1.1](#).

Then proceed here:

You can change the order location of the selected spare parts to “Own Stock”.

**Options**

**Delivery Comment**

standard ▼

**Where would you like the spare parts to be delivered**

**servicepoint**

**Customer**

**Delivery address**  Please Choose ▼

**free address**

**You selected the following spares.**

Material number	Description	LSF	Entry Date	Total	
<input checked="" type="checkbox"/> 88038464	CDR DVD DUMMY (ROHS) / SNP:A3C40071641	<input type="checkbox"/>	02.09.2009	1	Own Stock <span style="float: right;">▼</span>
					Set all to Own Stock <span style="float: right;">▼</span>

Click on <Next> to proceed; in the following window all work order settings can be verified.

Click on <Finish>

An information screen confirms the work order was created.

work order status changes automatically from “Requested” to “Open”. Status will stay in status “Open” until you change it manually with click on “repair started”.

(Only if you order spare parts from FUJITSU, then status changes from “Open” to “In Progress” automatically.)

### 4.1.3 Ordering High availability parts (4h Service Packs)

#### 4.1.3.1 Ordering

For high availability contracts e.g. 4h Service Packs, WO has to be opened in WCM Web as well. However it is not yet possible to order spare parts in WCM. Please order these parts as “Own stock”.

To order high availability parts, please use in Spare Parts Portal the area:

“High availability service (HV) for FUJITSU and Multivendor spare part”.

In Field: high availability/ Freezing contract number you have to select the Serial Number.

#### 4.1.3.2 Parts Return

Processing the claim WCM checks, if all ordered material was returned ([to claim check chapter 5.1.2](#)).

For the high availability spare parts ordered the [keep material flag \(chapter 4.5\)](#) has to be set.

This is a workaround until the high availability orders are integrated in WCM.

#### 4.1.4 Belated additional ordering

As long as a work order has the Status “In Progress” it is always possible to order additional material. When opened the work order Details, you can order again with clicking on “Order parts” at Actions section:

<input type="radio"/>				
<input type="radio"/>				

If Bulk material will be used for warranty calls, then return order has to be advised in WCM WEB and the related order number is to be entered manually.

return order

**Complaints** ▶ go to Warranty- or GoodPart>Returns

All necessary Returnorders have already been created (or no spareparts have been ordered).

**Input field for DoA-, WPiB- and WDel-Complaints**

Order No	Material number	Return-Material number	Total
<input type="checkbox"/> <input type="text"/>	<input type="text"/>	<input type="text"/>	1
		<b>DoA</b>	<b>WPiB</b> <b>WDel</b>
		<input type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/>

**Note**

If you leave the field "Ordernumber" empty, then automatically a suitable purchase order will be selected. Otherwise you can consequently enter a "Order No", then the return will be matched exactly with this purchase order.

**Attention**

A return order will be created regarding to the selected Material and its Amount.

**4.2 Repair Process**

**4.2.1 Repair started**

If the spare part is available, the repair process can be started. First step is to manually change the status into "Repair started" (open the work order Detail Actions: "Repair started"):

Click on <Finish> to proceed.

An Information Screen is shown that the repair is completed now.

Click on button <Finish> to shut the window; you are back in the work order Detail screen.

### 4.2.3 Repair failed - claim Double Flatrate

If the failure cannot be fixed at once, for pre clarified Help Desk assigned work orders you can request a second flat rate to be paid by using the function “Repair failed – Double FR”. For reasons of process government and active influence on the correct advice for the 2nd deployment on the same incident, this process needs to be controlled by the helpdesk. WCM will forward the request for a Double Flatrate to the Help Desk Team Lead in Support Assistant and will wait for a confirmation before adding the requested double flatrate to the work order. The status of the claims in rubric Double Flat Rate Calls changes to DoubleFRApproved. Subsequently you can proceed and finally change the status to repair finish.

If the double flatrate request is rejected by the HD team lead an additional status (Double flat rate rejected) will be sent via a status update. Here as well the process can be proceeded, e.g. set repair finish status. Only the normal flat rate is reimbursed.

You have to wait for the Helpdesk decision before you can continue the work order process. A double flat rate is only possible once per work. If the repair still fails a new work order has to be obtained from the FUJITSU Help Desk, the old work order has to be closed. The work order can be claimed including the already approved double flat rate.

Hint:

Rejection or acceptance depends on your comment. Only if everything is clear and plausible, HD will accept directly. Else the FUJITSU HD will ask you for more explanation or new failure diagnostic with end customer.

Out of warranty, customer refuses repair fee

## 4.4 Returning Spare Parts

### 4.4.1 Return order advise

Before sending parts back to FUJITSU Warehouse in Sömmerda, you have to advise the return in WCM.

#### 4.4.1.1 Adex Orders

In case of ADEX order, return order is already created. The part return form is printed and shipped with the ordered spare part.

Regarding the physical return process, please keep in mind the differentiation between RET-/RP-parts and N\*-parts:

- R\*-parts (WCM code is RET) have to be returned to FUJITSU.
- N-parts have only to be advised. Do not send these parts back to FUJITSU. BUT, good parts have to be returned to FUJITSU.
- NV parts are consumable parts and have only to be advised. Do not send these parts back to FUJITSU. Difference to N-parts: good part returns are not possible.

Detailed return terms are shown in the Service Logistics Manual at <http://partners.ts.fujitsu.com/com/service/general/service-spare/manual>.

Only in case of an Advanced Exchange (ADEX), e.g. if you have ordered only one part, the return order number is created with the order already. The part return notification is done automatically and the return order created already. The Part Return Form is available from the Spare Parts Portal and can be printed out up to 30 days when the (RP) defective part or a good part is to be send back.

In case of Non ADEX orders (e. g. if more than one part was ordered) you advise the return as follows:

#### 4.4.1.2 Orders with more than one part

In case of Non ADEX orders (e. g. if more than one part was ordered) you advise the return as follows:

Click on the return number and you will be transmitted into Spare Parts Portal. Here you can print out your PRF form, which you need for sending back the defective parts (see [chapter 4.4.2](#)). Please note this return order is only saved in the system for one day, therefore the PRF must always be printed out the same day.

#### 4.4.2 Physical part return

For the physical part return it is necessary to enclose the PRF-Form, which must be printed out of Spare Parts Portal.

Clicking on the return order number, as described in chapter 4.4.1, you will be routed to the Spare Parts Portal to section "order overview" in the "order tracking" function (as shown in second screenshot)

Screen Spare Parts Portal:

Please have in mind this functionality is only available if initial settings in your Service Partner Profile have been maintained accordingly. See chapter 2.1

USER

The return form must be printed out and attached to each part being returned.

**4.4.2.1 Return Code registration**

The Return Order reasons announced by the Service Partner might have changed during the posting of the defective part in the reverse logistics in Sömmerda. E.g. the part might be send in as defective warranty return because the Part Return Form accompanying the spares packages of ADEX deliveries already carries this code. However if the parcel is resend in original packed status, FUJITSU can store it again without preceding repair loop. The intake is booked as good part return, the return code is changed accordingly.

#### 4.4.3 Return orders in case of alternative material taken from own stock

The material number in the spare part proposal in WCM may differ from the material number delivered by FUJITSU spares operations if alternative parts are supplied. WCM and the spares application will take this into consideration in the fit to asset check during the return order process.

You may use alternative parts (original FUJITSU material) from own stock as well as long as the part is defined as alternative spare part for the related asset in the spare part catalog. You can check this out using the Translation Tool check function described in chapter 1.1.8 Selecting Spare Parts with 'Translation Tool' (virtual Fit-to-Asset Check).

#### **4.4.4 Return orders for out-of-warranty systems**

In case a Service Partner wants to return material, which has been used for an out-of-warranty repair the Spare Parts Portal should be used. Defective part return will be credited with a 'residual credit', if some applies to the part. In the Spare Parts Portal interface select 'returns' and go to 'return defective'. Detailed information is available from the Spare Part Portal Manual chapter 6.2.

#### **4.4.5 Return orders for work orders after 90 days**

To align WCM with the contractually agreed deadlines for spares returns in the FUJITSU Service Partner agreement for the delivery of spare parts, the age of a work order is checked. The return period for part returns is 90 days and work order dates are checked to validate that part returns for work orders after not older than 90 days<sup>1)</sup>.

The repair start date will be considered. If no start date is available yet, the Work Order Call Date is retrieved. If a defined threshold is exceeded (currently 90 days), the MIRO Warranty check result is negative and a new warning message appears in the Spare Parts Portal:  
"WCM-Error (work order older than 90 days No return order allowed)"

<sup>1)</sup> value set Feb. 2008

return order

#### **Returnorder**

**The return period for the material has expired.**  
To proceed please choose option '[Keep Material](#)'.

#### **4.4.6 Claim Reference on Part Return Form.**

The partner internal call number/text recorded by the Service Partner as Claim Reference is displayed on the Part Return Form for all Product Warranty Returns.

**Attention**

A return order will be created regarding to the selected Material and its Amount.

**4.5 Keep material flag**

**4.5.1 Customer keeps material**

On line item please mark single spare parts kept by the customer.

Service Partners maintaining systems with Top Up Warranty including HDD discard (“Service mit Datenschutz” if sold in Germany) shall not use this function as those return orders shall not be cancelled. WCM WEB is giving instructions on the bottom line of the keep material screen.

For orders updated with the keep material flag no return order is expected.

As for each ADEX order a return order already exists, the keep material flag triggers an automated info mail to Order Processing Spares. Order Processing Spares will cancel the return order. With Cancellation the return code CANCL is transferred to WCM Web.

A new flag on line item level is added. You can change setup as in [chapter 2.3 Edit line items display](#) described. The flag is set in the “despatched” line if ordered in Spare Parts Portal and in “proposed” line if it is an own stock order (see below [4.5.2 “Own stock material kept”](#))

#### 4.5.2 Own stock material kept

As WCM supports the SP to create return orders for all ordered spare parts, a warning message is displayed if the SP claims before all return orders have been created. See [5.1.2 ToClaimError](#). For parts ordered from own stock this means you have to set the keep material flag for all parts proposed but not used for the incident.

#### 4.6 Good part return and complaints (DOA, WPIB and WDel)

With action "Return order" you get the following screens. You can choose between creation of "Good part" return or complaint cases "DOA" (spare part is dead on arrival), "WPIB" (wrong part in box) and "WDEL" (Wrong delivery).

As a default the defect return and the Good Part return function is displayed. If you want to switch to the complaint orders (DOA, WPIB, WDEL) please press the bar "go to Complaint".

		<b>DoA</b>	<b>WPiB</b> <b>WDel</b>
		<input checked="" type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/>

MaterialNumber = Materialnumber according to delivery note

**Note**

If you leave the field "Ordernumber" empty, then automatically a suitable purchase order will be selected. Otherwise you can consequently enter a "Order No", then the return will be matched exactly with this purchase order.

**Attention**

A return order will be created regarding to the selected Material and its Amount.

Then click on <Finish>

As confirmation you receive the following screen:

return order

---

**Information**

The request for return orders is placed. Check order confirmation (813...) in detail view "call".

00000000008803753

**Remember:**

If you only mark the little box in front of the description a normal warranty return order is created.

#### **4.6.2 Workaround for DOA after repair finished**

##### 1. Repair:

Service Partner has opened WO# A with order 8000123456. After the SP finished the repair and sent back the defect part he can claim WO# A.

In case the new part again is defective shortly after repair the DOA rules apply.

##### 2. DOA repair

The Service Partner has to create a new order for the (again) needed spare part in Spare Parts Portal without WO#. For this order the SP receives an invoice.

After the repair is finished, the SP has to send the DOA part back to Sömmerda together with the delivery note and a visible comment on it stating: DOA for order 8000123456 [original order from first repair].

Important: NO return order has to be advised from SP!

With goods receipt in Sömmerda the FUJITSU Clearing will enter the appropriate warranty return order for the DOA part. Precondition: the system serial number still is under warranty.

The comment the SP noted on the delivery paper "DOA for order 8000123456", will be entered into the return order as reference.

These complaint orders and return orders are not shown in WCM, because there is no WO# reference entered.

**4.6.3 Wrong part in box (WPIB):**

return order

### 4.6.5.2 How to return unused parts – Overview

Please acknowledge the process for ADEX orders and NV-Parts differs from the process described above:

**Order type was ADEX\_**(Return order already exists): Please note „unused“ written manually on the Part Return Form and return it with the part to the FUJITSU Spares Return Center.

**Order type was NORMAL, STANDARD order:**

**Part is returnable:** The returned parts must be in their original packaging or the ESD packaging must be originally sealed. Use function Good Part Return in WCM.

**Part is non returnable:**

**(N-Part):** are non returnable parts. Unused parts should be returned, if they are in original packaging or the ESD packaging is originally sealed. Use function Good Part Return in WCM.

**(NV-Part):** MIRO is not accepting 'Good Part Return' for NV Parts.

For further details see Service Logistics Manual at:

<http://partners.ts.fujitsu.com/com/service/general/service-spares/manual>

## 4.7 Central work order monitoring

work orders where no material has been ordered yet and no repair started flag has been set within the last 90 days will be moved into a new status 'Awaiting immediate action' and the Service Partner gets an info message. 4.6.5.2 How to return unused parts – Overview

**FUJITSU THE POSSIBILITIES ARE INFINITE**

If the Service Partner does not reactivate the work order, it is cancelled after 20 days. With the reason "Not processed by SP". work orders cancelled in this way are recorded in action 'cancelled'.

## 5. Claiming and Invoicing

After repair has been finished successfully call can be claimed. For service calls with agreed performance the additional bonus as agreed in the Service Partner will be paid, if the successful repair is confirmed within the agreed time. Basic benchmark for performance is the customer satisfaction.

### 5.1 Claiming & Validation

#### 5.1.1 Claiming

After you have received the return order number from the system, the work order may be claimed. Please do not try to claim before the part return order is created for each part of this work order.

There are two ways to claim work orders for the following Invoicing/Crediting:

1) Starting from the work order Detail, using Action "Claim work order":

The screenshot shows the 'Workorder Detail' page in the WCM system. The 'Actions' menu is open on the right side, and the 'Claim Workorder' option is highlighted with a red circle. The main content area displays the work order details for a repair that is 'RepairSuccessful'.

Overview			
<b>Call Date</b>	<b>Workorder</b>	<b>Partner call number</b>	<b>Current Status</b>
14.05.2009	995002281086		RepairSuccessful
<b>Customer</b>	<b>Name</b>	<b>Product</b>	<b>ECS</b>
Fujitsu Siemens Computers GmbH	Kandziora, Georg	YK9B145940	5H214
<b>Response Time</b>	<b>repair time</b>	<b>Date of Carriage</b>	<b>DIFS-Code</b>
0	0	-	
<b>Service Type SP</b>	<b>Service Type Customer</b>		
BringIn	BringIn		

2) Starting from 'Repair Successful' Action work orders with existing Return Orders (= Return Advise) do have a checkbox, which can be ticked for claiming (this is convenient for a higher number of Calls to claim at once). Please acknowledge the checkbox will only appear after the return order is transferred from the Spare Parts Portal to WCM. This may take some time if the return notification was entered in Spare Parts Portal instead of WCM WEB.

In our example, only 3 boxes are selected for claiming and therefore ticked:

The screenshot shows the 'Service Calls (Repair successful)' page. A table lists work orders with checkboxes in the first column. Three checkboxes are ticked. The 'Actions' menu on the right is open, and the 'Claim Workorder' option is circled in red.

Workorder	Serial No.	Customer	Date	RT	Status	Call Number	
<input type="checkbox"/>	995002248134	YK3J098050	Tran, Thi Hanh	17.02.2009	0	RepairSuccessful	MCST-610950
<input checked="" type="checkbox"/>	995002264990	YKAJ083895	Curanum AG	24.02.2009	48	RepairSuccessful	MCST-612734
<input checked="" type="checkbox"/>	995002270019	YE8D000120	Fujitsu Siemens Computers GmbH	09.03.2009	0	RepairSuccessful	
<input checked="" type="checkbox"/>	995002270020	YE8D000119	Fujitsu Siemens Computers GmbH	09.03.2009	0	ResetToClaim	
<input type="checkbox"/>	995002270033	YK6T001706	Fujitsu Siemens Computers GmbH	10.03.2009	0	RepairSuccessful	

For both ways of claiming the 'Current Status' in the work order Detail has now changed into "ToClaim":

After the part is received back physically (!), the work order Status changes into “ClaimMovedToVC” and FUJITSU Validation Centre will verify the Call:

The Validation Centre (VC) proves the Call and has the possibility

- a) Of *accepting* it. Then the invoicing process can start.
- b) Of *shortening* it. Then you have to confirm or comment as next action...
- c) Of *rejecting* it. Then you have to confirm or comment as next action...

With rejection starts verification with the validation center. The Service Partner and the VC can communicate via WCM WEB. See 5.1.4 Rejected or revised work order

### 5.1.2 Claim Error

If a work order is claimed while not all return orders have been posted in WCM, you will receive a 'To Claim Error' message.

In work order detail the current status "ToClaimError" appears. In an information field the SP is informed about how much and which material numbers are not returned yet compared to the delivered material or material proposals from own stock.

Now you have the possibility to advise the remaining parts and to claim again.

The screenshot shows the 'Workorder Detail' page in the WCM system. The top navigation bar includes 'Home | Support | Logout'. A left sidebar contains a menu with options like 'Field Service', 'Technical question', 'Ersin', 'Translation Tool', 'Export', 'WCM News', 'DIFS for WCM', 'Spares', 'Reports', 'Settings', 'Customer', and 'Help'. The main content area is titled 'Workorder Detail' and is divided into several sections:

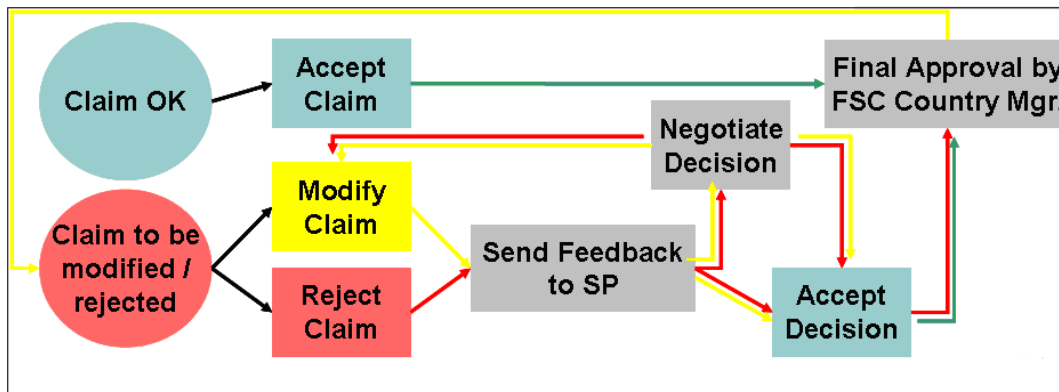

- Overview:** A table with columns for Call Date (14.10.2009), Workorder (995002281393), Partner call number, Current Status (ToClaimError), Customer (Fujitsu Technology Solutions GmbH), Name (Kandziora, Georg), Product (YK2F013507), Date of Carriage, DIFS-Code (2H114), Response Time (0), repair time (0), Service Type SP (OnSite), and Service Type Customer (OnSite).
- Information:** A red-bordered box containing a 'Validation Result' message: '52: Not enough return orders created' and '5 Missing 3x38008990 1x38008989 1x38006647'.
- CURRENT VIEW: CALL**
- ECS:** A table with columns for Condition (2 - Sporadic), Symptom (H - Hard disk, 1 - Hard disk is not recognized, 1 - Hard disk - internal), and Action (4 - HW-Repair with Spare).
- Problem Description:** 'test CR ToclaimError with detailed MATR'.
- Solution:** '12342342343242341'.
- Line Items:** A table with columns for Material number, Total, Status, Order No, RET-No, RET, ReturnCode, and KeepMaterial. It lists four material items with their respective quantities and statuses.
- Labour:** A table with columns for Material number, Status, Total, and price.

On the right side of the page, there are two panels: 'Actions' and 'Detail Views'. The 'Actions' panel includes options like 'Claim Workorder', 'Return order', 'Keep Material', 'Cancel Workorder', 'New Comment', 'Edit Reference Number', 'Print workorder', and 'Refresh page'. The 'Detail Views' panel includes 'Call', 'Messages', 'Customer', 'Product', 'Spares order', 'Workorder History', 'System History', and 'Invoice'. Below these panels are search fields for 'Workorder / Serial No.' and 'Adler'.

If the material is not returned (kept by customer or kept in own stock) please set the keep material flag. For details please see chapter [4.5.1 Customer keeps material](#) and [4.5.2 Own stock material kept](#).

### 5.1.3 Validation process

The agreement process may encircle some iteration and is based on communication with the FUJITSU Validation Centre or Service Partner Management contacts. See chapter [5.1.4 Rejected or revised work order](#)

As the WCM order process is based on early decisions about the Service Type accepted as warranty case, the negotiation process is the exception, not the rule.

The validation status of each work order is reported in the status screen:

**ClaimMovedtoVC** (included in status “Validation Centre”):  
 After spare part return has been received physically at Spares Return  
 Spares Return Centre work order is forwarded to the Validation Centre.

**ClaimRevisedByVC** (included in status “VC Revised Claims”)  
 FUJITSU Validation Centre has changed the claimed Service Type  
 After revised claim is accepted by Service Partner, the status will change to **ClaimAcceptedByVC** (in status Claims accepted)

**ClaimRejectedByVC** (incl. in status “VC Rejected Claims”)  
 FUJITSU Validation Centre rejected the claim completely.  
 If a rejected claim is accepted by you, the status will change to “Cancelled.”

**ClaimAcceptedByVC** (incl. in button “Claims accepted”):  
 If the Validation Centre did not change something but accept the claim, it will be paid with the next invoice summary.

If you answered to a rejection or comment of a VC decision, the work order can be found in “Replied to Validation Center”. After final agreement, the work order will be placed in the adequate status section and has to be accepted by the Service Partner

In general:

When browsing through the work order Details Service Partner may find all possible activities (accepting, commentate, etc) in Actions menu on the right side. (The possible activities depend on the status of the claim.)

By choosing “Accept rejection” (Action menu on right side) you can agree on the validation result from the FUJITSU Validation Centre. The work order will move to status “cancelled”. In case the work order was not rejected but revised only and you have accepted the decision from FUJITSU, the work order status will go to “ClaimAcceptedbyVC” and will be paid in the next invoice with this amount.

If you select “Reject rejection” (Action menu) a screen will open for your comments to be transferred to the Validation Centre within WCM.

By choosing “Accept rejection” (Action menu on right side) you can agree on the validation result from the FUJITSU Validation Centre. The work order will move to status “cancelled”. In case the work order was not rejected but revised only and you have accepted the decision from FUJITSU, the work order status will go to “ClaimAcceptedbyVC” and will be paid in the next invoice with this amount.

If you select “Reject rejection” (Action menu) a screen will open for your comments to be transferred to the Validation Centre within WCM.

The screenshot displays a web interface for handling a rejection. At the top left is the Fujitsu logo with the tagline "THE POSSIBILITIES ARE INFINITE". To the right, a button labeled "reject rejection" is visible. Below this is a form titled "Reject rejection". Inside the form, there is a "Reason:" label and a text area containing the text "rejection not acceptable". At the bottom of the form, there is a checked checkbox labeled "Rejection".

mark „Rejection“

Then click on <Finish>

The Call will change to the status “ValidationFeedbackBySP”.

For a better traceability of the communication all the communicated messages are stored in the work order History.

## 5.2 Invoicing

### 5.2.1 Overview

- 1) All work orders with the status “to Claim” will be forwarded for validation and invoicing. Precondition is that the return orders for all defective parts are created in Spare Parts Portal and reported back into WCM WEB.
- 2) The defective part is received back at FUJITSU.
- 3) The FUJITSU Validation Centre (VC) checks the claim:
  - a) The VC accepts or
  - b) The VC rejects or reduces the claim.
- 4) You have to accept reduced or rejected claims or clarify with the VC until you can accept the result.
- 5) The Validation Centre sends the clarified claims to the local FUJITSU claim approver (Service Partner Manager).
- 6) The local claim approver confirms.

Depending on the invoice process agreed in your SP Contract and defined in the WCM master data a credit note is issued automatically or an invoice proposal is sent, with which the Service Partner create the commercial invoice. Please also see [chapter 5.2.2](#))

### 5.2.2 Methods

For all Warranty Claims where the claimed amount is accepted by FUJITSU, e.g. no agreement on reductions or rejections is pending; there is a summarized invoice for all claims during the past period.

The length of the period is defined together with the responsible FUJITSU Service Partner Manager. It can be monthly, weekly, biweekly or even daily.

In principle there are two invoice processes possible:

- 1) FUJITSU creates and sends an invoice proposal with the invoice amounts agreed in the WCM process or

2) The service partner has agreed at the so called “credit like process” [or “Self-Invoice”] and FUJITSU prepares an invoice document in paper format and as pdf-file in the name of the Service Partner, which is paid (credited) automatically. The invoice in paper format is sent by mail to the Service Partner.

Additionally the .pdf file and a text file with all work order details are sent to the Service Partner for his internal usage.

The documents for point 1) and point 2) are similar. They only distinguish by the header. Below (chapter5.2.3) please find an example of an invoice in the “credit like process” prepared monthly.

The partner reference is added to the detail documents for both invoices and invoice proposals in the line items menu.

The FUJITSU description “Product related service costs for labour” is changed to Labour.

### 5.2.3 Documents

This is an example of a monthly prepared invoice in the “Credit-like/self-invoice process”:

<p><b>Sender</b></p> <p>Fujitsu Technology Solutions S.L.          Fujitsu TS Spain ES82 Serv.          AV. DE BRUSELAS, 13 ED. 1	995002369106	4800018874	2	Labour	15.04.2009	16,00%	235,00 EUR
2	995002370523	4800018878	2	Labour	14.04.2009	16,00%	235,00 EUR

In case of the "credit like process" you have no more action to do. The payment from FUJITSU will be received after the agreed time for payment allowed.

In case of the "standard" invoice process you can prepare the commercial invoice and send it to the local FUJITSU Service Contact.

Additionally a text file with all work order details is sent out. Including e.g. FUJITSU work order and Service Partner reference number.

Description of the work order detail text file:

#### **5.2.4 Commercial Invoice (standard/normal invoice process)**

The commercial invoice the Service Partner creates must contain the invoice proposal number and the grouping number of the invoice proposal from the .pdf file.

**The invoice amount must not differ to the sum in the invoice proposal, as all changes on the claims per work order are already processed and agreed earlier. Rejections or reductions of a warranty claim are only valid when verified with the FUJITSU Validation Centre and must be agreed before the claims are grouped for invoicing. All changes have to be recorded in the related work order in WCM WEB according to the described workflows. See 5.1.4 Rejected or revised work order.**

## 6. Forward work order

Depending on the country specific service processes, for special cases (e.g. AMILO, LIFEBOOK with Collect & Return service) forwarding a repair is possible.

Important: This function has to be activated in the country.

If you can't do the repair and forwarding is possible, then action <Forward work order> has to be used.

Action <Forward work order> is available after status repair failed is set.

**Actions**

- ▶ Repair started
- ▶ Update service type
- ▶ **Forward Workorder**
- ▶ Order parts
- ▶ Change status
- ▶ Appointment arranged
- ▶ Cancel Workorder
- ▶ New Comment
- ▶ Edit Reference Number
- ▶ Print workorder
- ▶ Refresh page

**Search for Workorder / Serial**

Workorder / Serial No.

**Adler**

Enter the Serial No.

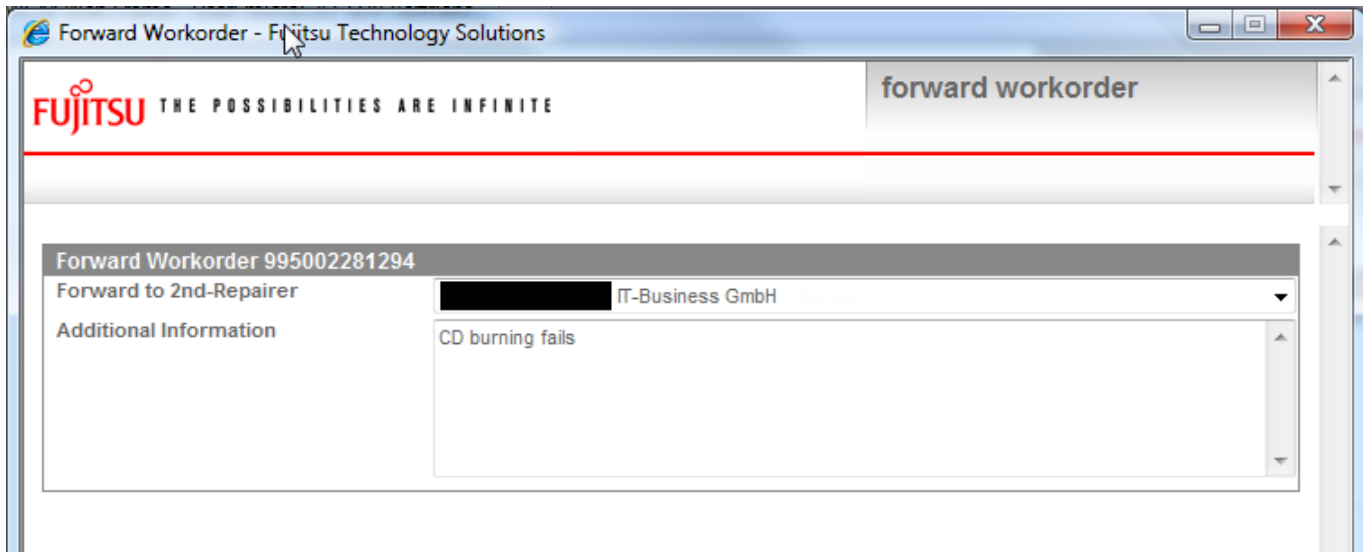

A list of authorized repairers is shown automatically. (See the next window.)

The error code and description will be copied from the old call and can be enhanced.

Selected spare parts are not forwarded to the new Service Partner.

Click on <finish>

After click on <refresh> the work order status changes to “Forwarded”. The Service Partner/ Repairer is displayed in the area “Solution”.

The screenshot displays the "Workorder Detail" page. On the left is a navigation menu with options like "Field Service", "Technical question", and "WCM News". The main content area is divided into several sections:

- Overview:** A table with columns for Call Date (21.09.2009), Workorder (995002281294), Partner call number (YKKR011111), Current Status (Forwarded), Customer (Fujitsu Siemens Computers GmbH), Name (Kandziora, Georg), Product (2E22U), Date of Carriage (-), Response Time (0), repair time (0), DIFS-Code, Service Type SP (Handling Fee), and Service Type Customer (Bringln).
- ECs:** A table with columns for Condition (2 - Sporadic), Symptom (E - Removable drives / changer, 2 - Write / burning-, read-error, 2 - CD / DVD-drive), and Action (U - Forwarded external with Spare).
- Problem Description:** A text box containing "CD burning fails".
- Solution:** A text box stating "Workorder 995002281294 forwarded to partner [redacted] T-Business GmbH (995002281295)".
- Line Items:** A table with columns for Material number, Total, Status, Order No, RET-No, RET, ReturnCode, and KeepMaterial. It lists material 34014125 with a total of 1 and status "Proposed". Below it, a "Labour" section shows "WTY:FLATRATE" with a status of "OK", a total of 1, and a price of 8.00 EUR.

On the right side, there are two panels: "Actions" with options like "Return order", "Keep Material", "New Comment", "Print workorder", and "Refresh page"; and "Detail Views" with options like "Call", "Messages", "Customer", "Product", "Spares order", "Workorder History", "System History", and "Invoice". At the bottom right, there are search boxes for "Workorder / Serial No." and "Adler" (Enter the Serial No.).

You will be responsible for the claim until the Service Partner/Repairer you forwarded the work order to, accepted the claim.

The Forward Service Partner/Repairer receives the claim in his In-Box. The reference of the forwarding SP is entered in the area Additional Information. All Customer Data and the original work order number are transferred as well.

Screenshots from Forward Service Partner/Repairer WCM WEB application:

The screenshot shows the WCM WEB application interface. At the top left is the Fujitsu logo with the tagline 'THE POSSIBILITIES ARE INFINITE'. The user is logged in as 'IT-Business GmbH'. The main content area is titled 'Service Calls (Assigned)' and contains a table with the following data:

Workorder	Serial No.	Customer	Date	RT	Status	ECS
995002281295	YKKR011111	[Redacted] Computers GmbH	21.09.2009	0	Assigned	2E224

On the left is a navigation menu with items like 'Field Service', 'Technical question', 'Ersin', 'Translation Tool', 'Export', 'WCM News', 'DIFS for WCM', 'Spares', 'Reports', 'Settings', 'Customer', and 'Help'. On the right, there are panels for 'Actions' (New service call) and 'Status' (Requested (0), Rejected (0), Assigned (1), Open (1), In Progress (37), Double Flatrate Calls (0), Awaiting Immediate Action (0), Repair successful (1), To claim error (0), Claim Workorder (50)). Below the table is an 'Additional Information' section with fields for 'Original Workorder: 995002281294' and 'Forwarded By: EDV-Vertrieb'. There is also an 'Information' section with the text 'CD burning fails'.

In case of Collect and Return Service a Pick Up and Return address can be defined additionally. Thus the Service Partner can define his own subsidiary as pick up location and e.g. the customer site as return location during the assignment to the Forward Service Partner.

The screenshot shows a 'new workorder' form in a browser window. The form is titled 'new workorder' and features the Fujitsu logo. It is divided into two main sections: 'Pick up address' and 'Return Address'. Each section has a 'Preselect' dropdown with radio buttons for 'Customer', 'partner', and 'Reset'. Below these are input fields for 'Company', 'Surname First Name', 'Street', 'Address 2', 'County', 'Post Code Town', 'Country' (a dropdown menu currently showing 'Deutschland'), 'Phone', and 'Date' (with a calendar icon). At the bottom of the form are four buttons: 'Quit', 'Back', 'Next', and 'Finish'. The browser's status bar at the bottom shows 'Vertrauenswürdige Sites | Geschützter Modus: Inaktiv' and a zoom level of '100%'.

After the Forward Service Partner/Repairer accepted the claim, you are informed about the new work order number the Forwarded Service Partner/Repairer received while taking over the call.

## 7. Annex

### 7.1 Error Message

In WCM following Error Messages may occur, if entries are not accepted:

No .	Reject Text in WCM WEB	Explanation
1	90 day rule	Call information forwarded too late (90 day rule)
2	7 days rule	Serial no. was already claimed recently.
3	Double WO	WO for this Serial no. already opened
4	Missing Qualification of SP	
5	FCO not accepted by SP	
6	WO not accepted by SP	
7	OoW, customer refuses repair fee	
8	Out of Warranty (OoW)	
9	Spare part asset mismatch	Spare part does not fit to this asset
10	Spare part error code mismatch	Spare part does not fit to the error code reported
11	Customer cancellation	
12	Wrong ADLER data – no proof provided	
13	No ADLER data – no proof provided	
14	Customer Self Inflicted	
15	Material OoW	Mat. is out of warranty
16	Spare part required	Spare part required according to error code
17	No spare part required	No spare part required according to error code
18	WO was claimed too late	
CN	Correction needed	

### 7.2 Service Call Status

At three different places in the WCM WEB-Screens status arise, which are explained here in detail to avoid misunderstandings and to ease the distinction when talking about any status.

#### 7.2.1 Service Call Status “1. Level”

In WCM WEB on Level Field Service, Service Calls are grouped into Status, which are shown there on the right side:

### 7.2.2 Status in specific work order

Within a work order (work order detail) the current status of this specific Call is also shown:

- WCM
- Field Service
- Technical question
- Ersin
- Translation Tool
- Export
- WCM News
- DIFS for WCM
- Spares
- Reports

### Workorder Detail

Overview			
<b>Call Date</b>	<b>Workorder</b>	<b>Partner call number</b>	<b>Current Status</b>

<b>Customer</b>	<b>Name</b>	<b>Product</b>	<b>DIFS-Code</b>
Fujitsu Siemens Computers GmbH	Schork, Robert	YK9B146690	2HM14
<b>Response Time</b>	<b>repair time</b>	<b>Date of Carriage</b>	
0	0	-	
<b>Service Type SP</b>	<b>Service Type Customer</b>		
BringIn	BringIn		

**Actions**

- ▶ Repair started
- ▶ Update service type
- ▶ Order parts
- ▶ Return order
- ▶ Change status
- ▶ Appointment arranged
- ▶ Keep Material
- ▶ Cancel Workorder
- ▶ New Comment
- ▶ Edit Reference Number

Often this “Current Status” does correspond to the Status of the Status-Group the work order belongs to at that time ([described in 7.2.1](#)).

But in some cases, e.g. Status-Groups “In Progress” and “Validation Centre”, the work orders can show different current status, which then gives more detailed information, e.g. the status of the ordered spare part or the exact claiming status.

Current Status in work order Details can be:

Status	Description
Approval	Not yet implemented
Assigned	work order assigned
AssignedFCO	assigned Field Change Order
AssignedToEmployee	Technician assigned
Cancelled	work order cancelled
ClaimAcceptedByVC	Claim accepted by Validation Centre
Claimed	Contains work orders where the defective material is posted.
ClaimMovedToVC	Claim moved to Validation Centre
ClaimPaid	Claim paid
ClaimRejectedByVC	Claim rejected by Validation Centre
ClaimRejectionAccepted	Claim rejection accepted
ClaimRejectionRejected	Claim rejection rejected
ClaimRevisedByVC	Claim changed by Validation Centre
Closed	Done
CostEstimationCreated	Cost estimation created
CustomerAgreedDate	Date agreed with customer
CustomerInformedToCollectSystem	Customer informed, that he can collect his system
CustomerKeepsMaterial	Customer keeps material, e.g. police protects sensible data
HD Open	Claim opened by Helpdesk
Open	work order opened
OrderConfirmation	Order confirmation
ParcelDelivered	Parcel delivered
ParcelPickedUp	Parcel picked up
Rejected	work order is rejected
RepairCentreLeft	System has left Repair Centre
RepairCentreReceipt	System has reached Repair Centre
RepairedSystemDeliveredToCustomer	System is repaired and can be delivered to customer
RepairFailed	Repair failed
RepairFailedAndDoubleFR	Repair failed, SP will get paid double Flatrate (if entitled)
RepairInterrupted	Repair interrupted
RepairStarted	Repair started
RepairSuccessful	Repair successful
Requested	work order requested
ResetToClaim	Reset from „To Claim“ to „Repair Successful“
RevisedClaimAccepted	Change of claim accepted
RevisedClaimRejected	Change of claim rejected
SparesInDelivery	Spares are delivered
SparesOrdered	Spares are ordered
SparesProposed	Spares are proposed
SPatCustomerSite	SP has reached customer
SystemReceived	System is delivered to SP
ToClaim	Request payment
UpdateServiceTypes	Service data update
WaitingForSystem	SP is waiting for System
ResumeCancelled	Resumption of cancelled Call
Spare Parts Receive	Spare parts have been received
ToClaimKeepMaterial	To claim, parts won't be sent back
ToClaimError	Not enough return orders have been created
DoubleFRApproved	Double Flat Rate is approved
VCChangesAccepted	Changes of Validation Center have been accepted

### 7.2.3 Status of ordered spare parts

If spare parts are ordered via WCM WEB and therefore an order in Spare Parts Portal was created automatically, the status of the part can be seen at the bottom in the work order detail.

Following Status can arise:

Proposed:	Parts are proposed, but nothing more.
Confirmed	Parts are selected. Order has been transferred to Spare Parts Portal and order number has been created.
Despatched:	Shipment out of FUJITSU stock has been done
Returned:	Return order is placed in Spare Parts Portal (In case of an ADEX order the Return Order is created automatically; therefore the Returned Status is given immediately. With a Non-ADEX order the Return has to be advised before Returned Status is given.)

Example:

Line Items							
Material							
Material number	Total	Status	Order No	RET-No	RET	ReturnCode	KeepMaterial
34001173	1	Proposed	<a href="#">8004919074</a>	-	<input checked="" type="checkbox"/>	-	<input type="checkbox"/>
34001173	1	Confirmed	<a href="#">8004919074</a>	-	<input type="checkbox"/>	-	<input type="checkbox"/>
SERV2200	1	Confirmed	<a href="#">8004919074</a>	-	<input type="checkbox"/>	-	<input type="checkbox"/>
34001173	1	Despatched	<a href="#">8004919074</a>	<a href="#">8137467430</a>	<input type="checkbox"/>	-	<input type="checkbox"/>
34001173	1	Returned	<a href="#">8004919074</a>	<a href="#">8137467430</a>	<input checked="" type="checkbox"/>	-	<input type="checkbox"/>
Labour							
Material number	Status	Total	price				
WTY:FLATRATE	OK	1	93.00 EUR				

### 7.3 Detail View Messages

“Messages” is a new button in <Detail Views>

With button Messages you can see all error messages, comments, information, etc. together.

### 7.4 Abbreviations of spare part data

In the process of ordering spare parts, material numbers are suggested and additional data is given, as there are:

WARRANTY:	Spare part is in warranty For a warranty repair, SP will receive a credit. Also limited warranty parts are marked with this flag.
LSF:	Local spare part Flag Spare part with local sourcing agreement with FUJITSU Service Country Management.
RET	Spare part is returnable E.g. the defective spare part has to be sent to FUJITSU.
ECS	Error Code System (Spare part fits to error code, if it is ticked at ECS field).
FTA	Fit To Asset (Spare part fits to the asset (serial number)).
